# Letter from the General Manager

#### **DEAR FRIENDS**,

The year 2016 was quite difficult for fishing industry in general, and Exalmar's activities were not exempt from challenges. For the third consecutive year we faced the impact of the El Niño phenomenon, one of whose consequences in 2016 was the lowest volume of fishing in the last eighteen years and the lowest number of days of production in our plants of fish meal and fish oil processing. Both circumstances affected the work in the areas of Indirect Human Consumption and Direct Human Consumption.

But, throughout our history as a company, Pesquera Exalmar has always been ready to face new challenges and to react soon under any circumstances. We have the experience, the desire to do things well and the ability to adapt ourselves to the new conditions of our environment, even in the difficult ones.

# LETTER FROM THE GENERAL MANAGER

PESQUERA EXALMAR HAS ALWAYS BEEN READY TO FACE NEW CHALLENGES AND TO REACT SOON UNDER ANY CIRCUMSTANCES.

And the last year was not the exception. Below, there is a brief summary of what happened during 2016, while we were facing difficulties, such as those previously mentioned, in Indirect Human Consumption and Direct Human Consumption areas.

In Indirect Human Consumption. During the second fishing season of 2015, PRODUCE allocated a quota of only 1110 thousand metric tons. This season began on November 17th, 2015 and finished on January 31st, 2016, which allowed a catch of 98% for the sector. The first season of 2016 be-

gan on June 26th and finished on July 27th, during which the sector caught approximately 51% of the quota allocated to 1800 thousand metric tons, as a consequence of the short season, because of its quite late beginning and its culmination by the end of July due to the usual beginning of the spawning period. The second season of 2016 began on November 15th and finished on January 27th, 2017, during which the sector caught 98% of the quota allocated to 2000 thousand metric tons.

In Direct Human Consumption. It is important to mention that the limited availability of giant squid and other species caused a significant drop in the use of the installed capacity of the freezing plant in Paita, which resulted in its temporary closure, until the consistent supply of raw material is reached, allowing the adequate use of the installed capacity. It is also important to remember here the scarce presence of resources, such as horse mackerel and mackerel, which also affected the use of the installed capacity of Tambo de Mora plant; although, since July, an important volume of mackerel has begun to appear.

In response to the difficulties, and having clear the objective to continue with the growth of the business unit of Direct Human Consumption, several

efforts were made to develop new markets and to search for direct customers through products of high added value.

On the other hand, thinking on the company sustainability in the long term, among other advances, the Company's Strategic Plan for 2020 was developed and approved, and the process of adoption of the best practices of Corporate Governance continued.

2016 was also the year when Pesquera Exalmar became a finalist in the IFFO (The Marine Ingredients Organization) annual awards, which recognize the commitment and leadership of the Company in the field of Corporate Governance. In addition, in recognition of its responsibility for the preservation and protection of the environment, Pesquera Exalmar was awarded by being registered in the Best Environmental Practices Record – OEFA (Agency for Environmental Assessment and Enforcement).

On the other hand, and despite the difficulties already mentioned in the fishing sector during 2016, Pesquera Exalmar respected the commitments assumed. Once again this demonstrates the Company's financial capacity to face an extended period of crisis generated by the impact of weather factors, maintaining a healthy position, with ade-

#### CARTA DE LA GERENCIA GENERAL

quate management of short-term debt maturities and compliance with obligations. Thus, as at December 31st, 2016, the short-term bank debt is covered at 151%, with inventories, cash and accounts receivable, mostly supported by letters of credit. Before, in September, a Tender Offer was made, which allowed the company to repurchase 15% of the issuance of corporate bonds current in market. It is also important to mention here that the line of

credit committed to Scotiabank for US \$ 20 million is still in force, with US \$ 5 million used.

But, for those of us who are Pesquera Exalmar, the issue goes beyond economy and becomes a matter of commitment. A commitment, in the broadest and inclusive sense of the term, of the company to the other representatives of the society, but also of the members of the society to the company. We

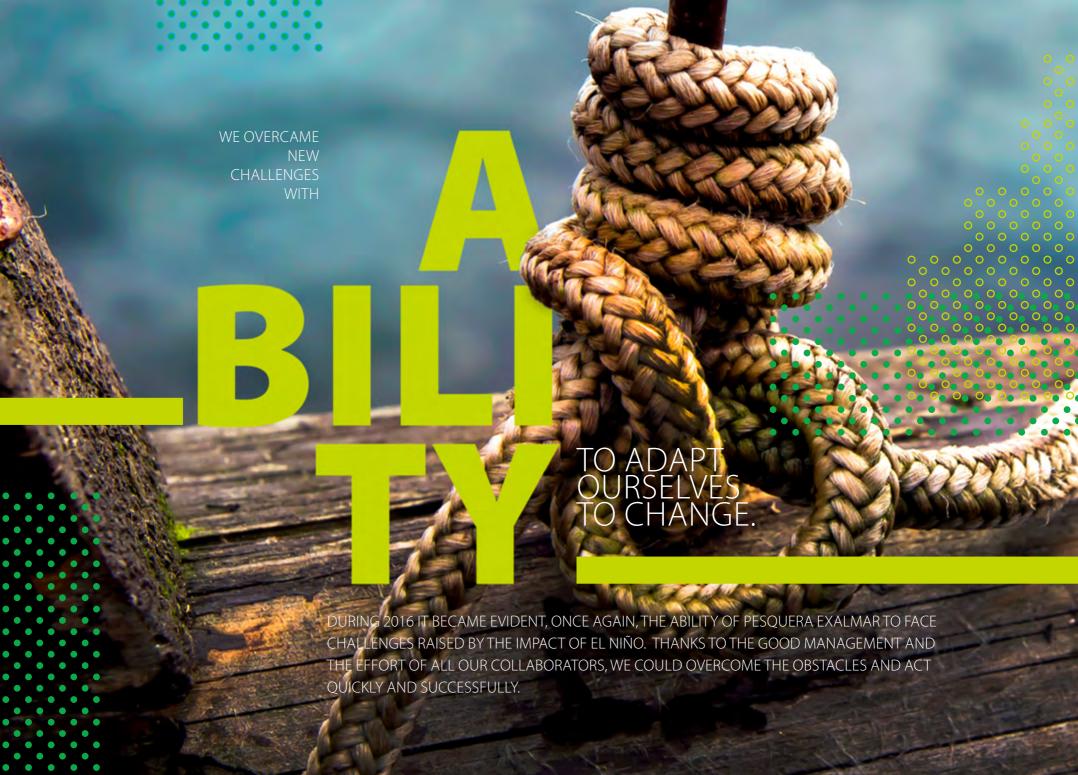

firmly believe that we all have something to contribute to society, that we all can make a contribution so that Peru become a better country, regardless of where we are and who we are.

We do it by performing a good job, by respecting the word committed, by assuming the responsibilities that our actions and omissions could lead to, by never yielding to the temptation to victimize ourselves at any the circumstances, by respecting the others to be worthy of their respect.

In Pesquera Exalmar, this spirit of commitment, almost tangible, is found everywhere and in it we find the strength that allows us to overcome obstacles. Therefore, I do not want to end these lines without thanking, equally, all those who make possible the existence and relevance of the Company: collaborators, directors, shareholders, investors, financial entities, fishing companies, artisanal fishermen, suppliers, customers. All of you who read this letter make it possible for us to continue working every day for the progress of Peru; moreover, give us reasons to see the future with optimism. con optimismo.

ROSSANA Ortiz Rodríguez GENERAL MANAGER

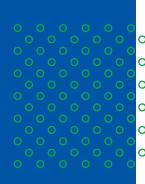

# EXALMAR DURANTE EL 2016

2016-was a challenging year for fishing industry, due to the persisting impact of El Niño for three consecutive years, which affected both Indirect Human Consumption and Direct Human Consumption.

En la primera temporada del 2016, el sector capturó aproximadamente el 51% de la cuota de 1,800 mil TM, debido a la corta duración de la temporada ante un inicio bastante tardío.

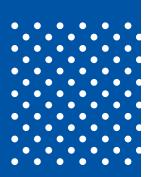

In the second fishing season 2015, the quota allocated by PRODUCE was only 1,110 thousand MT. Such season started on November 17th, 2015 and finished on January 31st, 2016, getting 98% of catch in the sector

The first season 2016 started on June 16th and finished on July 27th. The sector caught approximately 51% of the quota allocated to 1,800 thousand MT, due to the short season starting quite late and finishing by the end of July because of the normal start of the spawning season

The second season 2016 started on November 15th and finished on January 27th, 2017. The sector caught 98% of the quota allocated to 2,000 thousand MT

La baja disponibilidad de pota y otras especies, generaron una significativa caída en la utilización de las plantas de Consumo Humano Directo.

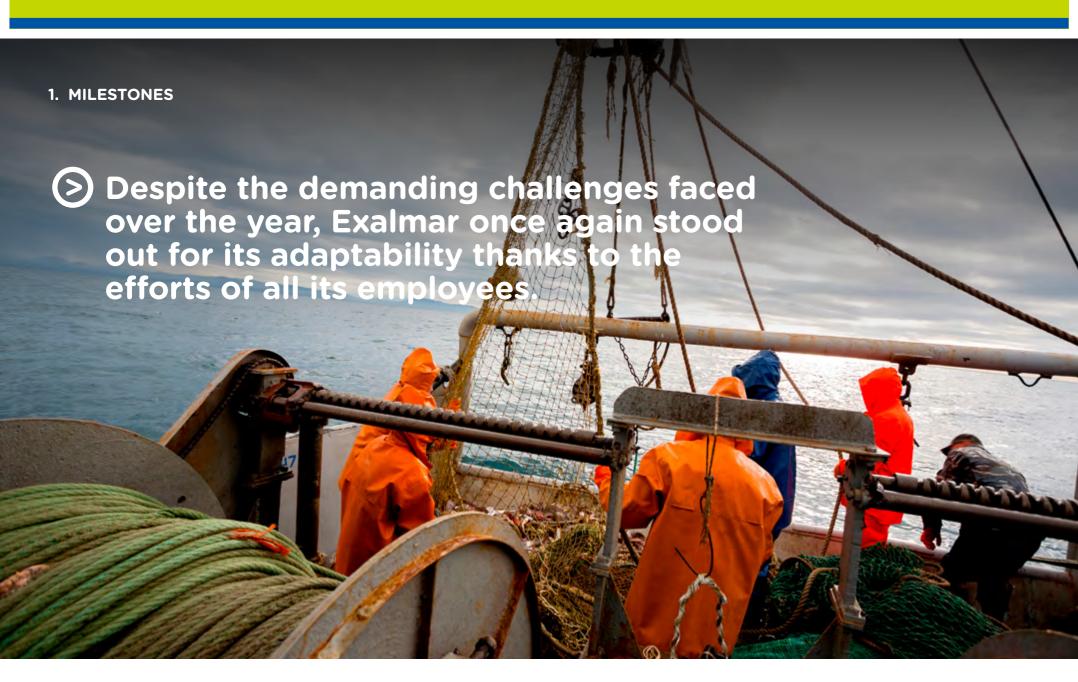

I. III. III.

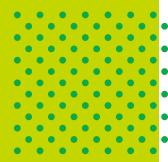

The low availability of giant squid and other species caused a significant drop in the use of the installed capacity in the plant of frozen products in Paita as well as its temporary closure, until achieving a consistent supply of raw material that allows an adequate use of the installed capacity.

In addition, there was a scarce presence of jack mackerel and mackerel till July, when appeared a significant volume of mackerel Given these difficulties and in order to continue with the growth of this business unit, various efforts have been made to develop new markets and direct customers through products of high added value. To this end, new product lines have been worked, strengthening the company's commitment to its collaborators and to the communities of artisanal fishermen from the various areas of the Peruvian coast

I.

II.

III.

IV.

V.

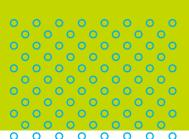

The company's Strategic Plan was developed and approved by the year 2020

The process of adopting the best practices of Good Corporate Governance continued. The launch of the new website, the approval of the General Shareholders' Meeting Regulations, the beginning of a sustainability management diagnosis, among others are highlighted

Exalmar was nominated as a finalist for the IFFO annual awards, recognizing its commitment and leadership in the field of Good Corporate Governance

In recognition of its commitment to the conservation and protection of the environment, it was considered in the Register of Good Environmental Practices of the OEFA

The lowest volume of fishing in more than 18 years and the shorter number of production days in our fishmeal and fish oil processing plants was recorded in 2016. In spite of this, the company maintained a firm commitment to its people, timely fulfilling with all its responsibilities

**ANNUAL** 

As at December 31st, 2016, the short-term bank debt was hedged at 151% with inventories, cash and accounts receivable, mostly supported by Credit Letters

II.

In September, a Tender Offer was made, which allowed the company to repurchase 15% of the current corporate bond issuance in the market.

III.

The credit line committed to Scotiabank for US\$ 20 million remains in existence; only US\$ 5 million of it have been used

# **Macroeconomic** Context

According to the Instituto Nacional de Estadística and Informática (INEI)<sup>1</sup>, the national economic activity grew up to 3.90% in 2016; making 89 months of continuous increase, determined by the favorable performance in most of the productive sectors, amongst which the contribution of Mining and Hydrocarbons sector is highlighted.

In 2016, the economic activity was characterized by the contrast between a solid growth of primary sectors, especially mining, and the fall of private investment. Although the recovery of construction sector was expected in the last quarters of 2016; this was not materialized due to the government's commitment to reach the fiscal objective in 2016.

According to the figures of the last Inflation Report of the Central Reserve Bank of Peru<sup>2</sup>, the GDP would continue growing up to rates slightly above 4.0% between 2017 and 2018, stimulated by domestic demand, considering that private investment would return to a higher rate of growth, due to the execution of the main projects delivered in concession and in the announcements of new concessions. Likewise. it is expected that the reversal of expenses in public

> THE NATIONAL ECONOMIC ACTIVITY GREW **UP TO 3.90% IN 2016; MAKING 89 MONTHS OF CONTINUOUS INCREASE**

<sup>1</sup> Technical Report N° 2, National Production, Instituto Nacional de Estadística e Informática (INEI), February 2017

<sup>&</sup>lt;sup>2</sup> Inflation Report: Current Outlook and Macroeconomic Forecasts 2016 – 2018. The Central Reserve Bank of Peru. December 2016.

#### **Macroeconomic Context**

EN EL 2016, LA ACTIVIDAD ECONÓMICA SE CARACTERIZÓ POR EL CONTRASTE ENTRE UN SÓLIDO CRECIMIENTO DE LOS SECTORES PRIMARIOS, EN ESPECIAL MINERÍA, Y LA CAÍDA DE LA INVERSIÓN PRIVADA.

Presentation of main macroeconomic results and sector opportunities, "Why to invest in Peru?", Proinversión, December 2016.

investment will be another important factor for the planned greater dynamism of domestic demand, due to the execution of infrastructure projects, such as Route 2 of Metro de Lima, Panamerican Games infrastructure, Refinery of Talara, among others. However, the most recent estimates show a reduction in the economic growth expectations, which stood at 3.8% for both 2016 and 2017, according to information from The Central Reserve Bank of Peru, updated as at February 3rd, 2017<sup>3</sup>.

During the last years, Peru shows a macroeconomic soundness internationally recognized after recording an accelerated growth over the past decade, leading the regional growth and allowing GDP per capita exceeds the world average by 20204. This growth has been driven by private investment, which today represents about 20% of GDP; considering that between 2016 and 2018 important announcements of private investment projects are expected, which represent US\$ 33,127 million approximately. In addition, domestic demand is strengthening and this is complemented by a dynamic commercial exchange which has been diversifying, as well as a context of macroeconomic stability, one of the lowest inflation rates in the region, a steady exchange rate, a country risk level under the regional average, a healthy level of debt, and international reserves by one third of GDP. Peru offers a favorable legal framework for foreign investment, ranking 3rd on ease for doing business in Latin America, after Mexico and Colombia, according to the most recent Doing Business 2017 edition, published by the World Bank. Moreover, it has a trade liberalization policy sustained over time and a responsible economic policy that have deserved such a degree of investment and the confidence of investors.

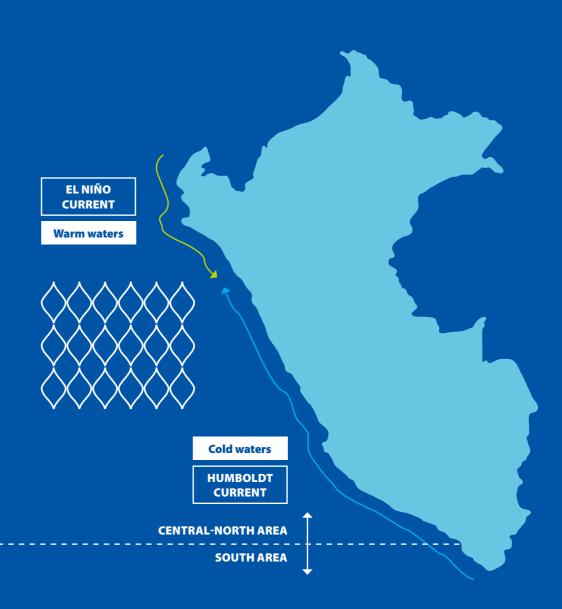

# **Fishery Sector**

Peru is the first exporter of fishmeal and fish oil worldwide. It is favored by unique geographic conditions due to the convergence of Humboldt and El Niño ocean currents, with an extensive fishing coast (longer than 3,000 km) and highly recognized biomass due to its quality and diversity.

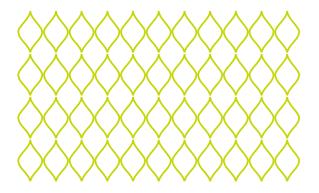

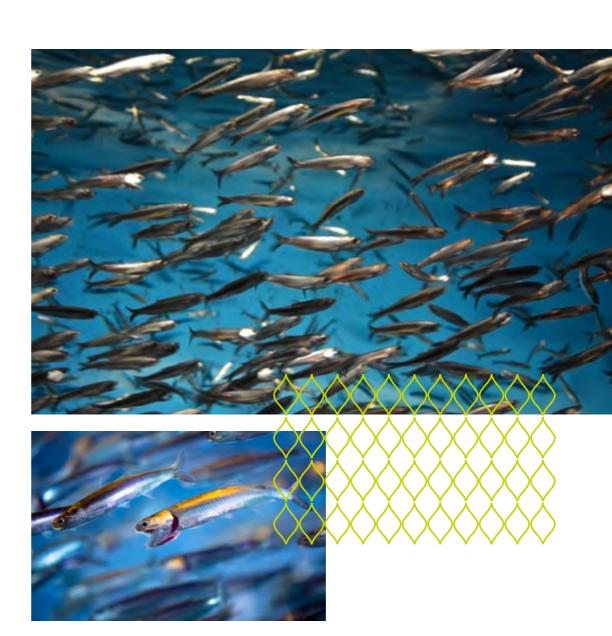

### **Fishery Sector**

In Peru, fishmeal and fish oil are produced from "anchovy" (Engraulis ringens), a small pelagic fish living in cold waters of Humboldt Current and which is distributed in two population units: north-center stock (from Paita to San Juan de Marcona) and south stock (from Chala to Chile). It is not a migratory species, which appears in long schools near the coast, with a short-cycle of reproduction (six months), and a life-cycle of three years. It reaches the middle size of first maturity when it is one year old and measures 12 cm long, the minimum size for fishing.

### **Fishery Sector**

#### **NUESTRA ANCHOVETA**

**Engraulis Ringens** 

Única especie autorizada para la producción de harina de pescado. Presenta diversas ventajas sobre otras especies.

#### **NO ES UNA ESPECIE MIGRATORIA**

Se distribuye a manera de dos unidades poblacionales: stock norte- centro y stock sur.

Su distribución está asociada a la extensión de aguas costeras frías de la corriente de Humboldt, (rangos que oscilan entre 16° y 23°C en verano y de 14° a 18°C en invierno), salinidades entre 34.5 y 35.1 ppm y elevadas concentraciones de nutrientes (fosfatos, silicatos y nitratos).

#### PRESENCIA CERCANA A LA COSTA

En función a la distancia a la costa, se encuentra anchoveta hasta las 80 millas marinas. Este alcance es variable ya que se ha podido observar hasta las 200 millas.

#### **EXTENSOS CARDÚMENES**

La anchoveta forma enormes cardúmenes que en períodos de alta disponibilidad facilita capturas de gran magnitud.

#### CORTO CICLO DE REPRODUCCIÓN

Ciclo de reproducción de 6 meses. Ciclo de vida: 3 años. Madurez: a los 12 cm de longitud (1 año de edad). En 3 años llega a un máximo de 20 cm. Talla mínima para pesca: 12 cm.

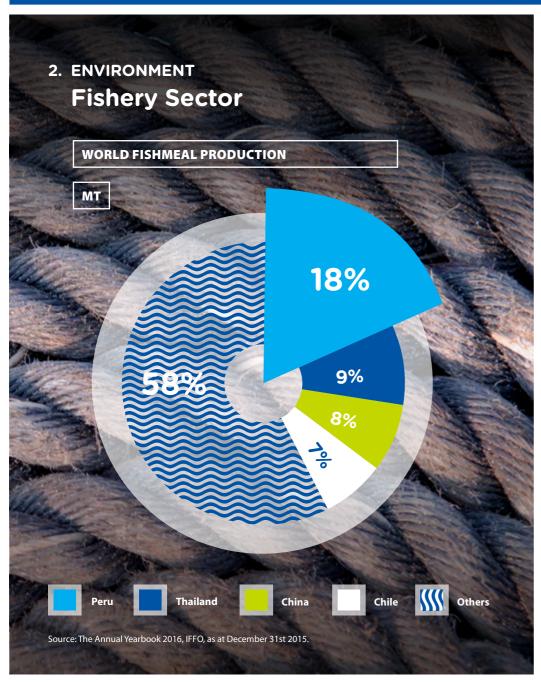

### **Fishery Sector**

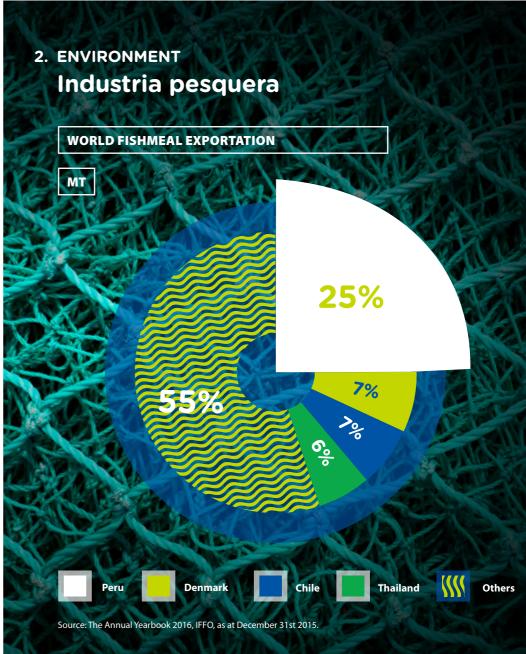

Since the system of individual anchovy fishing quotas entered into force in 2009, the country has had an effective regulatory framework. This has led the industry organization, as well as the quality and efficient use of plants and vessels, by reducing the number of vessels used, reaching greater productive efficiency, and, therefore, considerable savings on fixed costs and better production planning, which has allowed an efficient investment in the sector.

Given these conditions, Peru is the first producer and exporter of fishmeal and fish oil worldwide, being aquaculture the main use destination of these products. In 2015, Peru remained the first producer worldwide with a participation of 18%.

2016 ANNUAL REPORT

### **Fishery Sector**

The world supply of fishery resources is limited by a controlled catch due to the need of preserving the resource and to restrictions of producer countries for protecting the marine ecosystem; while global demand has showed a significant growth in aquaculture, especially in Asian countries, because of population growth and a diet rich in marine resources, as well as an important demand for animal food. Fish consumption is expected to continue growing, given the increasing demand of emerging markets and global tendencies related to healthy eating.

Because of its high protein content and high digestibility, fishmeal and fish oil produced from anchovy processing are the main sources of food in

aquaculture, and, in lower rate, for other animal species, such as pigs. Additionally, fish oil has been benefited in the last years by the new Direct Human Consumption demand through its Omega-3 type, given its proved benefits in coronary and neurological system. The greatest demand from Asian countries has higher per capita fish consumption rates in Europe and great potential of consumption in Africa and South America. Likewise, consumption patterns in developed countries for higher value-added products create potential demand of Direct Human Consumption products. In this way, limitations of supply in anchovy catch and the increasing aquaculture demand have carried to a sustained going up in the level of prices for fishmeal and fish oil during a number of years.

2016 **ANNUAL** 

## **Fishery Sector** in Peru in 2016

**2016 WAS A CHALLENGING YEAR** FOR FISHING INDUSTRY, DUE TO THE PERSISTING IMPACT OF EL NIÑO FOR THREE CONSECUTIVE YEARS

According to the Instituto Nacional de Estadística and Informática (INEI)<sup>5</sup>, production growth in 2016 was 3.90%, driven by mining and hydrocarbon sector, among others. The fishery sector had a negative contribution of 0.04%, while in 2016 there was a contribution of 0.14%.

In 2016, the fishery sector had a variation of -10.09%, because of a lower catch of marine species, especially for Indirect Human Consumption, against 2015 when it had a growth of 15.87%.

2016 was a challenging year for fishing industry, due to the persisting impact of El Niño for three consecutive years.

In Indirect Human Consumption, there were weather factors affecting two fishing seasons (second season 2015 and first season 2016), reaching the lowest levels of fishing in recent years. In Direct Human Consumption, the low availability of resources had a significant drop in use of plant capacity.

In this way, 2016 was the year with the lowest unloading of anchovy in the sector, with the exception of 2014 when the second season was suspended. It was also the year with the lowest exports of fishmeal and the lowest volume of production, with the exception of 2014.

<sup>&</sup>lt;sup>5</sup> Technical Report N° 2, National Production, Instituto Nacional de Estadística e Informática (INEI), February 2017.

# **Regulatory Framework**

The Ministry of Production (PRODUCE), through the Vice-Ministry of Fisheries, is the governing body of fishery sector in the country. Its functions are: to manage resources rationally, to promote fish production, and to develop fishing in general. On the other hand, the Instituto del Mar del Peru (IMARPE) fulfills an important function when studying the environment and marine biodiversity, assessing fishery resources, and providing information and advice for decision-making on fishing, aquaculture, and marine environmental protection.

The Vice-Ministry of Fisheries, along with IMARPE, has a number of monitoring instruments allowing

it controlling the access to catch and processing of pelagic resources, such as the application of closed seasons, specification of total permitted volumes of catch, minimal catch sizes, and percentage of young individuals permitted in catch, determination of protected areas, establishment of non-fishing zones or fishing prohibition, among others. Considering the volume and size of the existing infrastructure, anchovy and sardine were declared as species fully exploited. This involved the restriction of new fishing vessels to catch these species. Authorizations have been granted only to replace the existing fleet.

Likewise, two periods of closed season are annually set for anchovy, which vary according to the resource availability and anchovy life cycle. Generally, fishing seasons are from May to July, and from November to January.

Sector standards are mainly contained in the General Fisheries Act (DL 25977) and its Regulations (DS 01-94-PE). The aim is to regulate fishing activities in order to promote sustainable development as a source of food, employment, and earnings, as well as to ensure the responsible use of hydro-biological resources.

In addition, the following relevant facts that meet an important contribution to the development of fisheries sector stand out:

## MONITORING AND CONTROL PROGRAM FOR FISHING & UNLOADING:

In 2003, permanent monitoring and control are created in places of unloading, strengthening actions to control the proper operation of weighing equipment in industrial fishing establishments; and through monitoring and control of vessels which do not have fishing permissions.

LA NORMATIVA DEL SECTOR PESQUERO ESTÁ CONTENIDA PRINCIPALMENTE EN LA LEY GENERAL DE PESCA Y EN SU REGLAMENTO.

### **Marco Regulatorio**

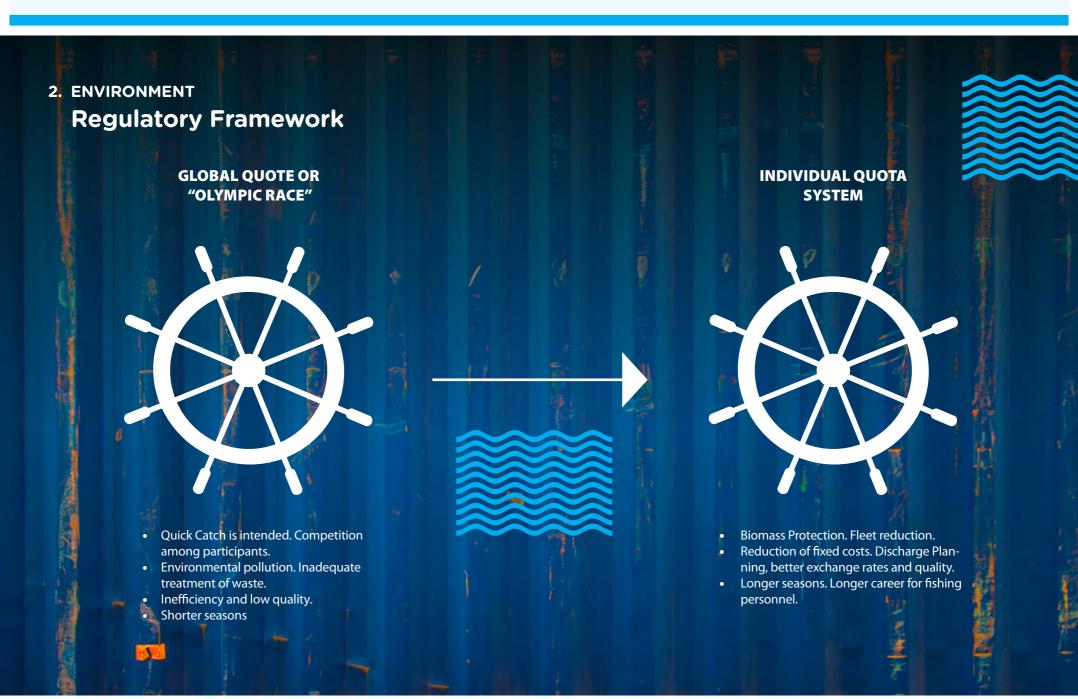

IN 2008, THE ACT OF MAXIMUM LIMITS OF CATCH WAS ENACTED, CHANGING FROM THE SYSTEM OF GLOBAL QUOTA OF CATCH TO A MIXED SYSTEM, WHICH COMBINES A QUOTA OF CATCH PER SEASON AND THE ALLOCATION OF MAXIMUM LIMITS OF CATCH PER VESSEL.

#### **ACT OF MAXIMUM LIMITS OF CATCH:**

In 2008, the Act of Maximum Limits of Catch (Legislative Decree 1084 and its corresponding Regulations) was enacted, changing from the system of global quota of catch to a mixed system, which

combines a quota of catch per season and the allocation of maximum limits of catch per vessel (LMCE), or individual fishing quotas. This system of individual transferable fishing quotas (ITQ) was implemented since the first fishing season 2009 onwards, and allowed each authorized vessel catching anchovy until completing their individual quota or a percentage of the total catch permitted. It is intended to protect the resources, because years ago it was seen an inordinate race or "Olympic Race" among the participating agents, in order to access the maximum rate of the global quota authorized in a minimum time, significantly reducing fishing days. In 2009, Exalmar was operating with less than 50% of its vessels, and successfully caught its allocated quota.

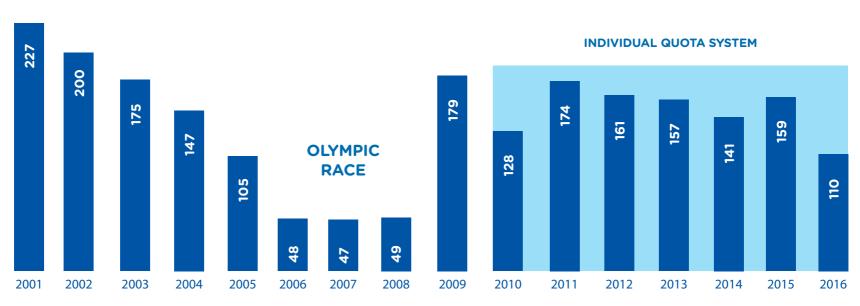

### **Regulatory Framework**

#### **FISHING DAYS**

This new system meant a change, not only for companies but also for many crew members who would lose their jobs with the reduction of the fishing fleet. Therefore, in order to support those who adopt the system established in DL 1084, a program of voluntary benefits financed by the contribution of fishing companies (owners) for Indirect Human Consumption was created. These programs include:

### **Regulatory Framework**

#### **RESERVE AREAS FOR ANCHOVY CATCH:**

In 2012 the Supreme Decree No. 005-2012 and other additional rules were issued, whereby reserve areas designated to catch anchovy for Direct Human Consumption were established. Artisanal vessels were defined as those having a hold capacity up to 10 m3, and small scale fishing vessels as those with more than 10 m3 and up to 32.5 m3 of hold capacity. On the other hand, it was established that between 0 and 5 miles artisanal vessels would be authorized to catch anchovy exclusively for Direct Human Consumption, while the area between 5 and 10 miles would be allocated to small scale fishing vessels, which should preferably allocate their catch to DHC. Fishing for the industry which produces fishmeal and fish oil would be conducted

by vessels greater than 32.5 m3 of hold capacity, making their fishing away from 10 nautical miles.

In 2013, the Chamber of Constitutional and Permanent Law of the Supreme Court of Justice of the Republic, in process of Popular Action, rendered item 2.2 of Article 2 in Supreme Decree N° 005-2012-PRO-DUCE invalid. Afterwards, SD 011-2013-PRODUCE was issued, through which it was ordered to keep reserve areas allocated to catch anchovy for Direct and Indirect Human Consumption. However, by Resolution No. 09, the Fourth Civil Chamber of the Superior Court of Justice of Lima, through an injunction, suspended the application of Supreme Decree No. 011-2013, allowing again industrialists catching anchovy from the mile 5.

In 2015, by Supreme Decree No. 001-2015-PRODU-CE, the regime for catching anchovy resource allocated for direct human consumption in the south was established. This rule renders Supreme Decree 001-2013-PRODUCE invalid, reducing the area exclusively reserved for direct human consumption, and stating that the industrial fleet will carry out its activities out of the Reserve Area, established from the coastline up to mile 5.

Finally, by Resolution dated December 19th, 2016, the Permanent Constitutional and Social Law Chamber of the Supreme Court of Justice of the Republic issues sentence in the process of POPULAR ACTION No. 4196-2015, declaring unconstitutionality of Supreme Decree N 011-2013-PRODUCE, reaffirming the provisions by means of a precautionary measure and definitively allowing the industrial fishing of anchovy from mile 5.

# 3. COMPANY INFORMATION

Pesquera Exalmar SAA is a leading company in fishery sector. With more than forty years of experience, it participates in the catch, processing and commercialization of high quality and high protein value marine products, generating bonds of trust with its stakeholders over time.

Exalmar promotes human talent and is considered as an agent of social change; consequently, it contributes to the development of its collaborators and the community related to fishing in the areas where it operates. Thinking on the benefit of communities and the development of future generations, the company promotes growth based on sustainable development, supporting conservation and protection of the environment, in accordance with a regulatory framework that seeks to ensure preservation of marine resources. It also stands out for its commitment to Good Corporate Governance practices and is endorsed by the following international certifications regarding quality, safety and environment: BRC, OHSAS 18001, ISO 14001, GMP +, IFFO RS, BASC, AC OMEGA, Friend of the Seas. In addition, the Company participates in the HACCP Program.

EXALMAR PROMOTES HUMAN TALENT AND IS CONSIDERED AS AN AGENT OF SOCIAL CHANGE; CONSEQUENTLY, IT CONTRIBUTES TO THE DEVELOPMENT OF ITS COLLABORATORS AND THE COMMUNITY RELATED TO FISHING IN THE AREAS WHERE IT OPERATES

#### 3. COMPANY INFORMATION

# Name, address, constitution and corporate purpose

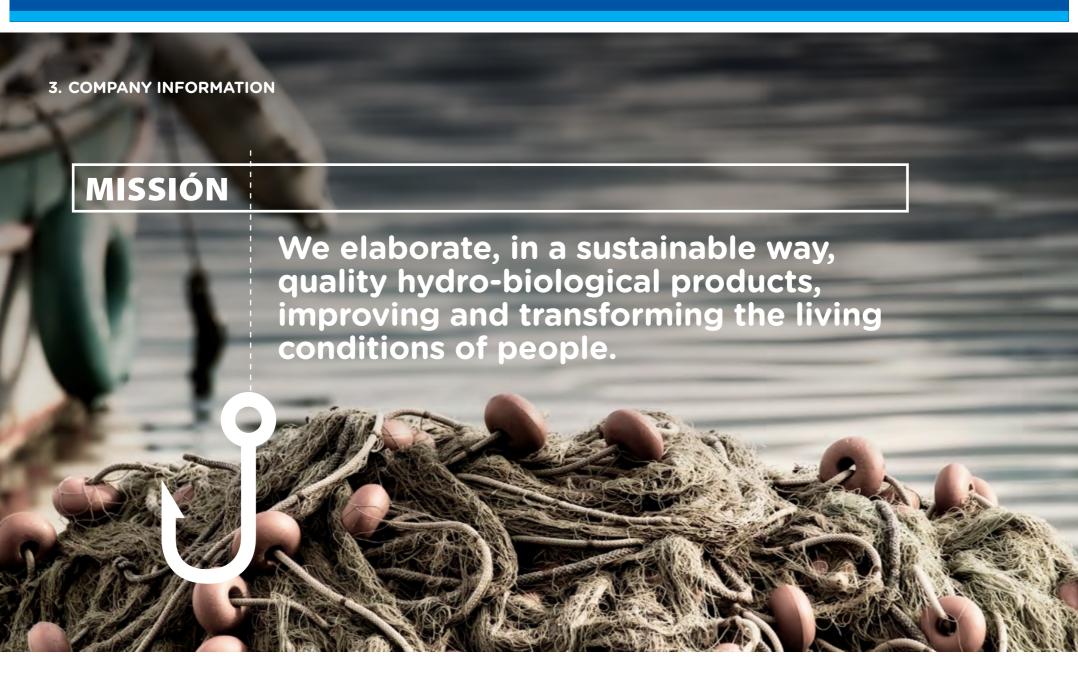

Pesquera Exalmar S.A. was incorporated as a public limited company by means of public deed granted on November 25th, 1997, before the Notary Public of Lima, Dr. Walter Ramón Pinedo Orrillo, registered with Entry A 001 in the Electronic Record N° 11006351 of the Register of Legal Entities of Lima.

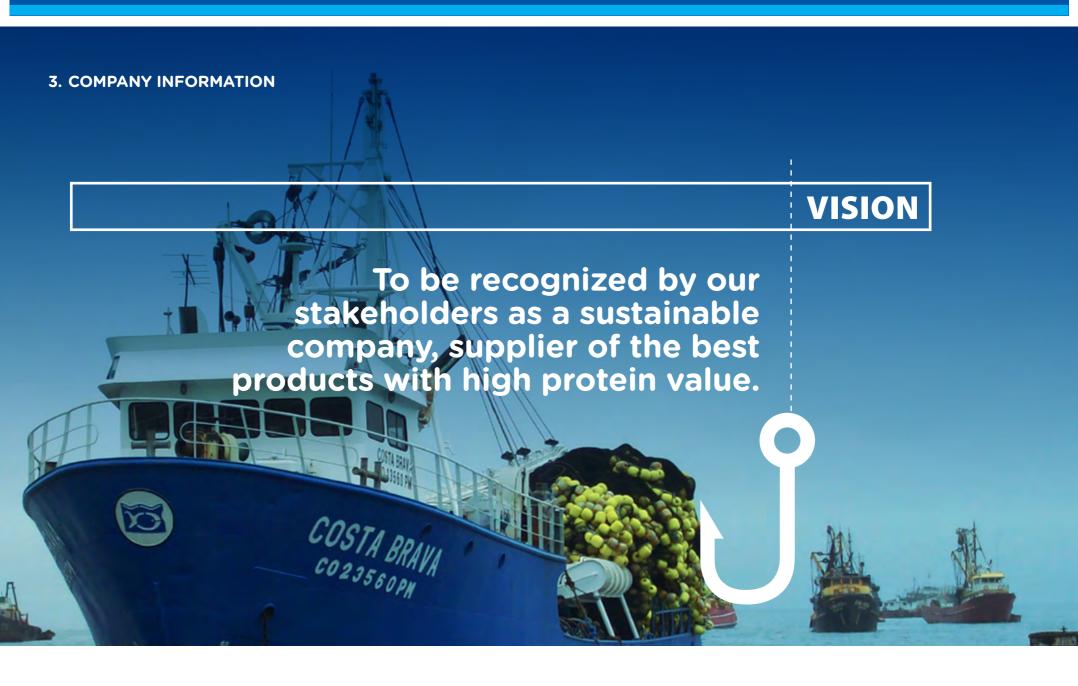

By agreement of the General Meeting of Shareholders held on November 1st, 1997, converted into public deed on December 5th, 1997, before the Notary Public of Lima, Dr. Walter Ramón Pinedo Orrillo, Corporación Matta S.A. changed its name to PESQUERA EXALMAR S.A.

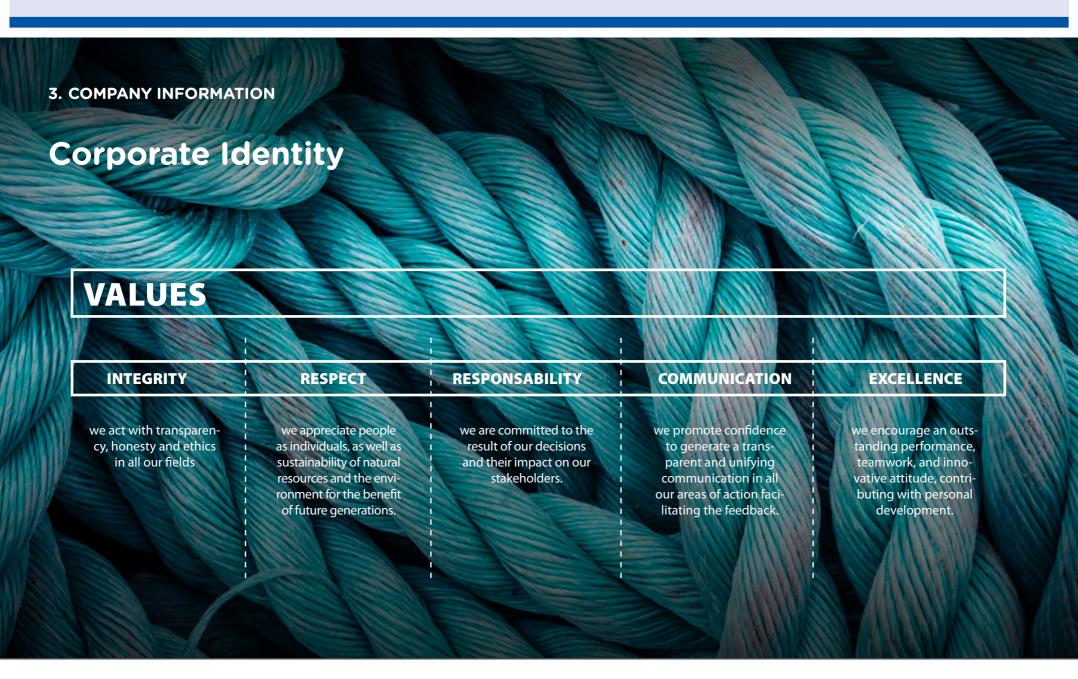

By public deed granted on January 5th, 1998, before the Notary Public of Lima, Dr. Ricardo Ortiz de Zevallos V., Pesquera Exalmar S.A. merged with Pesca Perú Huacho S.A., Pesquera María del Carmen S.A. and Exalmar S.A. The purpose of this company is the extraction, transformation, commercialization and export of hydro-biological products for Direct and Indirect Human Consumption, as well as the import of supplies for its business activity, wholesale and retail purchase/sale of those products, representation of them, and other related or similar activities. Likewise, without excluding related activities, the company can engage in production and commercialization of fishmeal and fish oil. The company has an indefinite duration. These activities are classified under the CIIU Code 15127. Its economic activity is governed by the General Fisheries Act, its regulations and amendments.

The headquarters is located at Av. Víctor Andrés Belaúnde 214, San Isidro, Lima, Peru. The phone number is 51 1 441 4420.

THE PURPOSE OF THIS COMPANY IS THE EXTRACTION, TRANSFORMATION, COMMERCIALIZATION AND EXPORT OF HYDROBIOLOGICAL PRODUCTS FOR DIRECT AND INDIRECT HUMAN CONSUMPTION.

# **Economic Group**

Here is the list of the main companies of Grupo Matta which are linked to us.

#### **COMPLEJO AGROINDUSTRIAL BETA S.A.**

Complejo Agroindustrial Beta is, nowadays, the first producer and exporter of fresh green asparagus in Peru and worldwide; and the second exporter of frozen green asparagus and table grapes in Peru.

Víctor Matta started this prosperous company, with a modest cultivation of vegetables in lands located in his home town Chincha. In addition, initially, he was dedicated in parallel to the laying hens business. In 1993 he formed Complejo Agroindustrial Beta S.A. with an agro-industrial export vision that aimed to develop permanent

crops with clear competitive advantages regarding other countries in the rest of the world. Nowadays, the following products are exported, all grown in their own fields: fresh green asparagus, frozen asparagus, table grapes, blueberries, mandarins, tangelos and avocados.

Location and growth of the fields have varied significantly since the beginning in Chincha. Nowadays it operates in the following areas: Ica (296 h. of grapes and 1,250 h. of asparagus), Paracas (160 h. of asparagus and 60 h. of tangelos), Chincha (99 h. of mandarins and 61 h. of avocados), Jayanca (872 h. of asparagus and 40 h. of avocados), Chulucanas (520 h. of grapes), Olmos (420 h. of avocados and 250 h. of blueberries) and Pacora (45 h. of blueberries and 200 h. of asparagus), making a

COMPLEJO AGROINDUSTRIAL BETA IS, NOWADAYS, THE FIRST PRODUCER AND EXPORTER OF FRESH GREEN ASPARAGUS IN PERU AND WORLDWIDE; AND THE SECOND EXPORTER OF FROZEN GREEN ASPARAGUS AND TABLE GRAPES IN PERU.

2016 ANNUAL

### **Economic Group**

total of 4,200 h. approx., with around 1,000 h. additional for future growth.

Moreover, the company has seven packing plants: one in Ica (for grapes), two in Chincha (one for asparagus and the other one for multiple processing, such as avocados or citric fruits), other in Jayanca (asparagus) and three in Chulucanas (for grapes); besides a plant for frozen asparagus in Ica. The main destinations for its production are: the USA, Europe and Asia.

Likewise, Complejo Agroindustrial Beta provides direct employment to approximately 8 thousand collaborators and represents a great agent of change, intensive generator of work and promoter of development in different areas of the country where the State does not always arrive. From its beginnings, it worked with the communities

related to agriculture in the zones of influence to show them how this activity could be modernized, promoting a new mentality in the people. This has allowed thousands of families to improve their quality of life.

In 2016, sales of Complejo Agroindustrial Beta (Beta Agro-industrial Complex) raised up to US\$ 115 million approx., and the EBITDA up to US\$ 30.0 million.

**COMPLEJO AGROINDUSTRIAL BETA PROVIDES DIRECT EMPLOYMENT TO APPROXIMATELY 8 THOUSAND COLLABORATORS AND REPRESENTS A GREAT AGENT** OF CHANGE, INTENSIVE **GENERATOR OF WORK AND** PROMOTER OF DEVELOPMENT.

## Share capital, shareholders and share evolution

As at December 31st, 2016, the fully subscribed and paid-up capital of the Company amounts to S/. 295'536,144, divided into 295'536,144 common shares with voting rights for a nominal value of S/. 1.00 each one. All shares provide their holders the same rights and liabilities.

The shareholding composition as at December 31st, 2016, regarding shareholders with more than 5%, was the following:

SHAREHOLDERS	SHARES	PARTICIPATION	ORIGIN
Caleta de Oro Holding S.A.	180,048,423	60.92%	Panama
Caleta de Oro Holding del Perú S.A.C.	25,000,000	8.46%	Peru

HOLD CAPACITY AND IHC QUOTAS

## **Description of operations**

#### **INDIRECT HUMAN CONSUMPTION:**

#### **Productive process:**

Fishmeal and fish oil production process begins when catching anchovy; it continues with the process of storage, cooked-pressed, dried, milled, and packaged.

All our plants have indirect steam drying system. Besides, two of our plants use natural gas as energy source: Callao and Tambo de Mora.

We are strongly committed to the environment; thus we treat all our effluents, emissions and residues, fulfilling with current environmental regulations. Indeed, one of our recent achievements has been to certify in all our plants the validity of the international environmental management standard ISO 14001.

Finally, the commercialization of our fishmeal and fish oil products reaches Europe and Asia, mainly, under direct sale or by brokers.

## **Description of operations**

#### **Products:**

#### a. Fishmeal:

Fishmeal contains 65% and 70% of high quality proteins and it is rich in Omega 3. Thus, it is an essential source of food and energy used as supply for feeding animals in the cattle industry, both bovine and porcine, and mainly in aquaculture.

Fishmeal has become a strategic component in the formula used for aquaculture, optimizing the development, growth and reproduction of fish. Its nutrients help against disease resistance by stimulating and helping to maintain a healthy immune system.

It has numerous advantages in its use for its high quality protein and energy source, as well as health benefits due to its EPA and DHA content, and increased animal welfare and productivity, resulting in immunity improvement, reduction of mortality and severity of inflammatory diseases.

#### b. Fish oil:

It is valued for its health benefits, thanks to its essential fatty acids EPA and DHA. It is used in aquaculture industry, and also for human consumption by capsules that are an important supplement for human health.

## **Description of operations**

#### **DIRECT HUMAN CONSUMPTION:**

#### **Productive process:**

There are two well-defined production systems in the freezing plants for DHC: one is for manual operations performed by personnel specialized in making frozen hydro-biological products; and, the other is automated and it uses state-of-the-art equipment, specific for processing pelagic species, such as jack mackerel and mackerel.

ANNUAL

## **Description of operations**

#### a. Manual production system:

It begins with the unloading and reception of raw material in the Processing Plant. Then, primary or conditioning operations (filleting, eviscerating, finning, laminating, die-cutting, pre-cooking) are made in order to can the product according to the presentation the customer requires. During all the process, time and temperature are controlled, then the product is frozen in forced air blast tunnels or contact plate freezers in order to conserve its characteristics and preserve it in frozen state for a period

of time. Afterwards, the product is packed and labeled with relevant information for performing traceability, and goes into the cold storage chamber to keep the cold chain and quality of the products till its dispatch (local sale) or shipment (export).

## **DIRECT HUMAN CONSUMPTION - PRODUCTIVE PROCESS: LOW-RISK AND DISPATCH OR UNLOADING HIGH-RISK PROCESS STORAGE SHIPPING**

## **Description of operations**

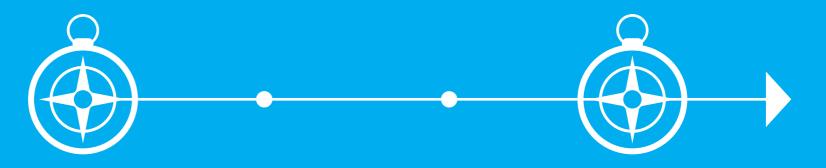

This system, specific for pelagic species, such as jack mackerel and mackerel, begins pumping the fish from the holds of ships having refrigeration system on board (Refrigerated Sea Water - RSW)

for continuing the cold chain. Afterwards, it continues to the buffer tank and is taken to the production line or fish-storage sheds, which have a refrigeration system.

#### **DIRECT HUMAN CONSUMPTION - PRODUCTIVE PROCESS:**

CATCH AND UNLOADING

LOW-RISK AND HIGH-RISK PROCESS

STORAGE

DISPATCH OR SHIPPING

## **Description of operations**

On production lines, the fish is classified through an automatic system. Then, it is sent to manual selection belts, where pelagic species or pieces which are not adequate for freezing, because of physical or mechanical damage, are separated by trained personnel. Afterwards, the product is conveyed to distribution lines, where the previous classified product is taken to scales having smart applications to weight it. Packing is automated, and, by a robot system, the boxes full fish are placed on racks for being conveyed to freezing tunnels and continuing the freezing stage. During all the process, time and temperature are controlled. Then, racks with boxes full of frozen product are conveyed to an automated equipment in order to be conditioned on pallet's, which are placed into the cold storage chamber, whose purpose is to keep the cold chain and quality of the products till its dispatch (local sale) or shipping (export).

THE OBJECTIVE IS TO PROVIDE THE NECESSARY CONDITIONS FOR CONVEYING THE PRODUCT TO ITS FINAL DESTINATION.

In the dispatch or shipping process, personnel of finished products and shipping verify hygiene, cleanliness, hermetic seal of containers, as well as the correct functioning of the cold system. The objective is to provide the necessary conditions for conveying the product to its final destination.

## **Description of operations**

#### **Products:**

In Direct Human Consumption, healthy foods with high protein and Omega 3 are developed, recognized for their quality and exquisite taste. In the category of frozen products, the giant squid or pota, mahi mahi, jack mackerel, mackerel, squid, sea scallops, swordfish, silverside and anchovy stand out. Meanwhile, among pota-based value-added products, breaded sticks and hamburgers, nuggets, non-breaded burgers and seafood mixture are developed.

### **Description of operations**

#### **MAIN ASSETS:**

#### **Fleet**

As at December 31st, 2016, the fleet operates 23 vessels, with an operative hold capacity of about 7,329 m3. The company has an own allocated quota of 6.67 % (Centre – North area) and 4.46 % (South area), for the development of Indirect Human Consumption activities.

- The second fishing season 2015 started on November 17th, 2015 and finished on January 31st, 2016. The sector catches 98% of the quota allocated by PRODUCE, only to 1,110 thousand MT.
- The first season 2016 started on June 26th and finished on July 27th. The sector catched approxi-

mately 51% of the quota allocated to 1,800 thousand MT, due to the short season starting quite late and finishing by the end of July because of the habitual start of the spawning season.

 The second season 2016 started on November 15th, 2016 and will finish once reached the quota allocated to 2,000 thousand MT, or when recommended by IMARPE. As at December 31st, 2016, the sector had caught approximately 67% of the quota allocated.

Out of the total operating fleet, six vessels have RSW (refrigerated sea water) preservation system, with a total hold capacity of 2,570 m3, and also current permits for the extraction of jack mackerel and mackerel for Direct Human Consumption. Li-

kewise, there are state-of-the-art cooling systems, as well as electronic and navigation equipment that meet the highest standards, which allow us to preserve the raw material to be discharged in the plants.

It is important to mention that by the end of 2015, there are four vessels in Trust and one in secured transaction in favor of entities from financial system. This supports the company's particular credit operations, such as long-term loans and committed lines of credit.

## **Description of operations**

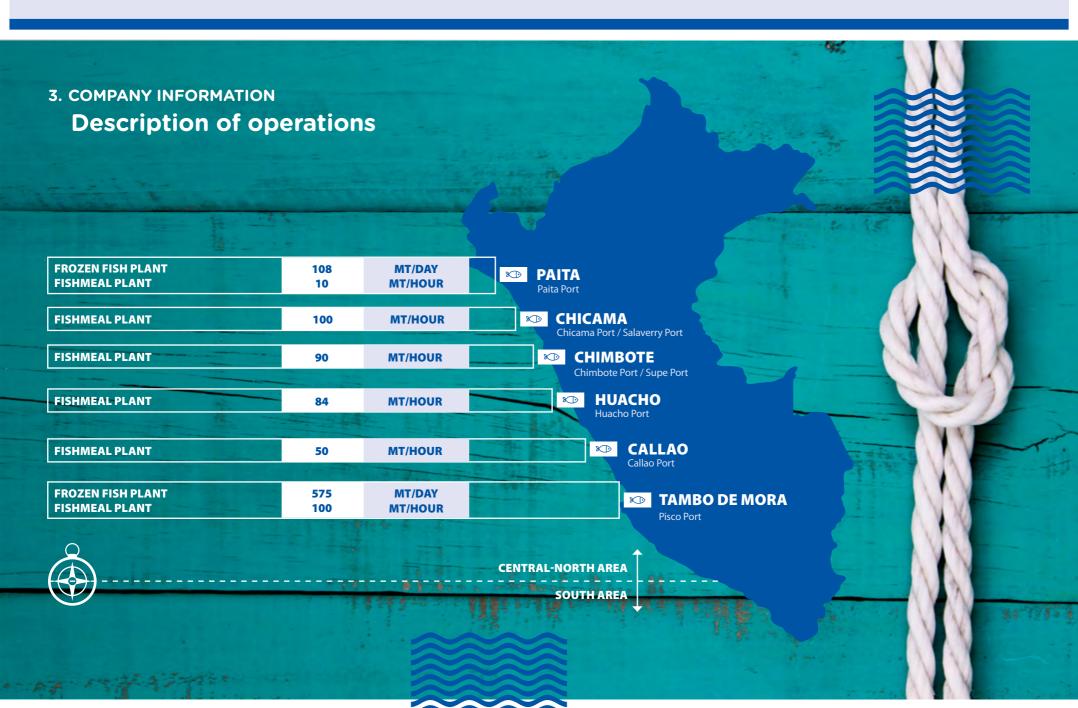

#### **Processing Plants**

The company has six plants for producing fishmeal and fish oil, located in Tambo de Mora, Huacho, Callao, Chimbote, Chicama, and Paita, with a total processing capacity of 434 MT per hour. The six plants, strategically located along the Peruvian coast, allow us optimizing the production and reception of raw material, both from the own fleet or third parties.

Likewise, there are two plants for making frozen products (Direct Human Consumption), strategically located in Tambo de Mora (575 MT / day) and Paita (108 MT /day). As at December 31st, 2016, the plant in Paita is temporarily closed due to the low availability of species oriented to Direct Human Consumption, causing a significant decrease in the use of the installed capacity in that plant.

4. BOARD OF
DIRECTORS AND
MANAGEMENT

Exalmar cuenta con un Directorio compuesto por cinco miembros independientes y dos miembros dependientes, asegurando la pluralidad de enfoques y la representatividad de todos los grupos de interés.

Hay algo que aprendí desde muy joven, que adopté como filosofía de vida y que podría resumir en esta frase:

Si vamos a hacer las cosas, vamos a hacerlas bien.

Es decir, sin informalidad, trabajando de manera seria y responsable. Esta filosofía la comparten todos los que conforman Exalmar, por eso es que somos una empresa con profesionales serios, en quienes se puede confiar. Y no porque lo digamos nosotros, sino porque así lo demostramos con los hechos. Ahí radica, creo yo, la razón del éxito de Exalmar, su crecimiento y su vigencia.

**Víctor Matta Curotto**Presidente del Directorio

maintenance management, operations and integrated management systems (Safety, Protection, and Quality). He was Fleet Marine Superintendent at Trabajos Marítimos S.A. for 12 years, an important maritime and port operator in Peru. He has been working in his current position since 2012.

**6. JUDITH VIVAR RAMÍREZ.** Business Manager with a Master degree in International Business from the Peruvian University of Applied Sciences (UPC). She has a long career in the fisheries sector of Peru, mainly in areas of marketing, quality, fishmeal and fish oil commercialization, as well as management,

implementation, and logistic operator management, within the distribution chain. Likewise, she has experience on import and export of products, such as soy flour and fertilizers, at renowned Peruvian companies. She has been working in her current position since 2009.

**7. MARIANGELLA MATTA DALL'ORSO.** Graduated from the Faculty of Marketing of the University San Ignacio de Loyola and Administration and International Business of the High Technological Institute of Foreign Trade – ADEX. She studied courses in the area of negotiation, developed at Harvard University. With professional experience in sales, he joined Pesquera Exalmar S.A.A. in 2003 with functions in the IHC Commercial area. She has been in her current position since 2011.

**8. DEMIÁN BALLÓN ESPINOZA.** Business Manager from Ricardo Palma University, with a Master degree in Corporate Finances from the University of Applied Sciences (UPC). He was Head of Management Control at Inretail Peru Corp, and Assistant Manager of Management Control and Projects at Intercorp Retail. He has been working in his current position since 2014.

**EDUARDO LAGO.** Fishing Engineer from the National Agrarian University - La Molina, member of the engineering society. He has a Master degree in Maintenance Management by the National University of Callao and an MBA from Ricardo Palma University. He has specialized studies on Total Quality and Productivity, Integrated Management Systems with ISO9001, ISO14001, OHSAS 18001 and SA8000 (Corporate Social Responsibility) Standards, Logistics, Project Management, and Industrial Production Systems, based on The Theory of Constraints. He studied at Netzsch Pumps (Brasil), Transvac (USA) and Optimar (Norway). He has been working as DHC Operations Manager since 2011; previously, he served as Superintendent of Plant Maintenance in 2007, and as the Superintendent of Chimbote Plant, in 2004. He has been working at Pesquera Exalmar S.A.A. since 1999, as Chief of Production in Chicama Plant. Before, he worked as Chief of Production for the frozen food plant at Frigorificos AESA-Agropecuaria Esmeralda S.A. He worked as DHC Plant Operation Manager since 2011 until January 2017.

#### FIRST SEASON 2016 IN THE NORTH-CEN-**TRAL REGION:**

- The first season 2016 in the north-central region began on June 26th and ended on July 27th, 2016. The sector caught approximately 51% of the guota of 1,800 thousand MT allocated by PRODUCE, in comparison to the first season 2015 in which 98% was caught. This low level of catch occurred as a consequence of the short season, due to a very late onset and its culmination at the end of July because of the usual beginning of the period of anchovy spawning.
- In this first season, the Company had its own quota of 6.67% for the north-central region and reached a participation of 11.1% in the total processing, being the fourth one in the fishing sector in terms of fishmeal and fish oil processing in the first season.

10.3 %

## **Indirect Human Consumption (IHC):**

## SECOND SEASON 2016 IN THE NORTH-CENTRAL REGION:

- The second season of 2016 in the north-central region began on November 15th and ended on January 27th, 2017. The sector caught 100% of the quota of 2,000 thousand MT allocated by PRODUCE in comparison to the second season 2015 in which 98% of the quota of 1,110 thousand MT was caught and the first season 2016 in which 51% of the quota was caught.
- By the end of the season, the Company had its own quota of 6.95% for the north-central region, due to rental operations carried out in January 2017. In this way, it reached 14.0% of participation in the total processing, which meant the third position in the fishing sector in terms of processing of fishmeal and fish oil in the second season.

#### **SOUTH REGION:**

- By means of Resolution No. 017-2016-PRODUCE published on January 20th, 2016, the beginning of the first fishing season 2016 in the south region was authorized, with a TMLAC (total maximum limit of allowable catch) of 382 thousand MT. This season began on February 2nd and ended on June 30th, 2016, with an effective catch of 40% of the companies in the sector.
- By means of Resolution No. 242-2016-PRODUCE published on July 1st, 2016, the beginning of the second fishing season 2016 in the south region was authorized, with a TMLAC (total maximum limit of allowable catch) of 382 thousand MT. This season began on July 7th and ended on December 31st, 2016, with an effective catch of 8% by companies of the sector.
- Likewise, by means of Resolution No. 010-2017-PRODUCE published on January 11th, 2017, the beginning of the first fishing season 2017 in the south region was authorized, with a TMLAC (total maximum limit of allowable catch) of 515 thousand MT. This season began on January 17th and will end once reached the TMLAC or, otherwise, it cannot exceed June 30th, 2017.

## **Indirect Human Consumption (IHC):**

#### **CATCH AND PROCESSING:**

• Considering that, in general, annual financial statements include the sales corresponding to the production of the second quota of the previous year and the first quota in the current year, in 2016 the financial statements of the companies from this sector included an effective quota of approximately 1,998 thousand MT, the lowest in 15 years; while in 2015 it was included an effective quota of 2,508 thousand MT.

### **Indirect Human Consumption (IHC):**

#### **INVENTORIES:**

- In 2016, there was an initial inventory of fishmeal of 32.1 thousand MT, as a result of the catch and processing corresponding to the second season 2015, in comparison to 2015 when there was a low inventory level, as a consequence of the suspension of the second fishing season in 2014.
- As at December 31st, 2016, such first inventory plus the production meant an available for sale of 110.1 thousand MT (101.9 thousand MT in the previous year), from which 65.0 thousand MT were sold, remaining a final inventory of 45.5 thousand MT.
- It is worth to mention that 59% of the fishmeal volume available for sale was sold, which corresponds to the production of the first season 2016 and the remainder of the second season 2015, remaining a something corresponding basically to a part of the production of the second season 2016.

 Sales of fish oil as at December 31st, 2016 were 7.3 thousand MT, remaining a final inventory of 6.7 thousand MT (2.2 thousand MT in the previous year).

(\*) La captura efectiva del año 2016 corresponde a caballa.

The production of the Plant in Tambo de Mora reached 16.423 MT as at December 31st, 2016. increasing 151% in relation to the previous year, due to the availability of mackerel in the third quarter of the year.

## **Direct Human Consumption (DHC):**

- As at December 31st, 2016, there was a final DHC inventory of 5,704 MT of various species, in comparison to 1,740 MT as at December 31st, 2015.
- In Direct Human Consumption, the year 2016 has been significantly affected by the following:
  - Scarce presence of jack mackerel and mackerel until July.
  - Low availability of giant squid and other species, generating a decline in the use of the installed capacity of the Plant in Paita and its temporary closure until achieving a supply of raw material that allows an adequate use of the installed capacity.
- Given these difficulties and in order to continue the growth of this business unit, various efforts have been made to develop new markets and direct customers through products with high added value.

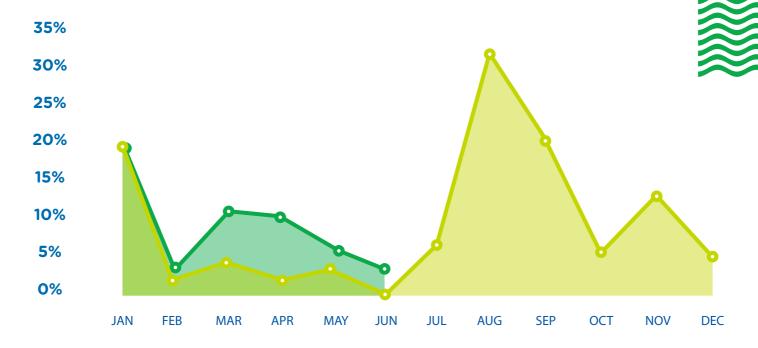

2016 ANNUAL REPORT

# **Direct Human Consumption (DHC):**

# Financial Information

 Financial Statements as at December 31st, 2016, show the effect of:

(I) Reduction in sales (-13%) as a consequence of lower effective catch during the second season 2015 (1,084 thousand MT) and the first

season 2016 (914 thousand MT), which implies a reduction of 20% in the effective catch in comparison to the previous year;

(II) Increased number of closed days in 2016 due to the late start of the first season (256 closed days in 2016 in comparison to 206 days in 2015).

(III) Low availability of resources for DHC processing, as well as the temporary closure of the plant in Paita

As at December 31st, 2016, EBITDA was US\$
20.7 million, which includes an IHC EBITDA of
US\$ 26.2 million and DHC EBITDA of US\$ -5.5
million. Despite the low availability of raw material for DHC processing, EBITDA for this business unit was increased by 103% in comparison to the previous year.

US\$ MILLION	AS AT 4Q15	AS AT 4Q16	VARIATION

(\*\*) Estimated EBITDA does not consider the other incomes/expenses (because they are non-recurrent items) nor sharing to workers.

## **Financial Information**

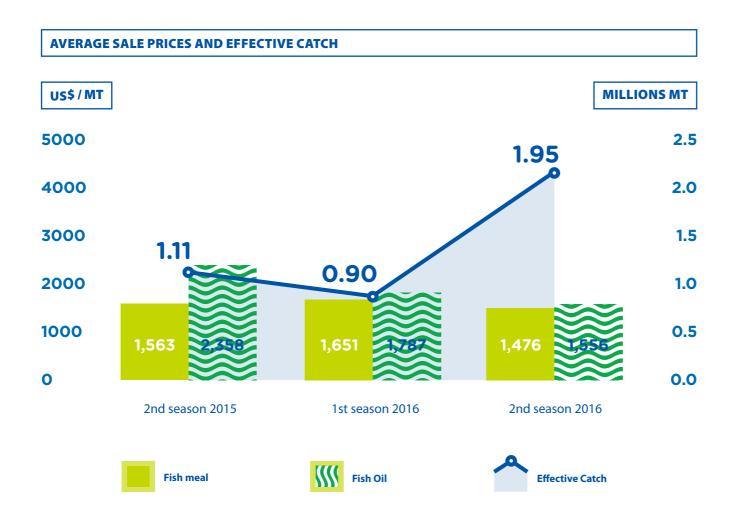

# **Sales**

- As at December 31st, 2016, total sales decreased by 13% in comparison to the previous year.
   IHC sales decreased by 14%, which was basically explained by a lower effective catch in the first season 2016 due to its late start.
- Because of the higher quota allocated in the second season 2016 and its 100% effective catch, the average sale prices of fishmeal for this season were reduced by 11% in comparison to the first season 2016 (effective quota of 914 thousand MT) and by 6% in comparison to the second season 2015 (effective quota of 1,084 thousand MT). The average prices of fish oil per season showed a significant reduction basically due to its lower quality.
- Sales value of fishmeal in 2016 was reduced by 12% in comparison to 2015, due to a sales volume lower than 7% and a price lower than 5%.
- As at December 31st, 2016, 59% of fishmeal volume available for sale was sold, mainly corresponding to the production of the second season 2015 and the first season 2016.

### **Sales**

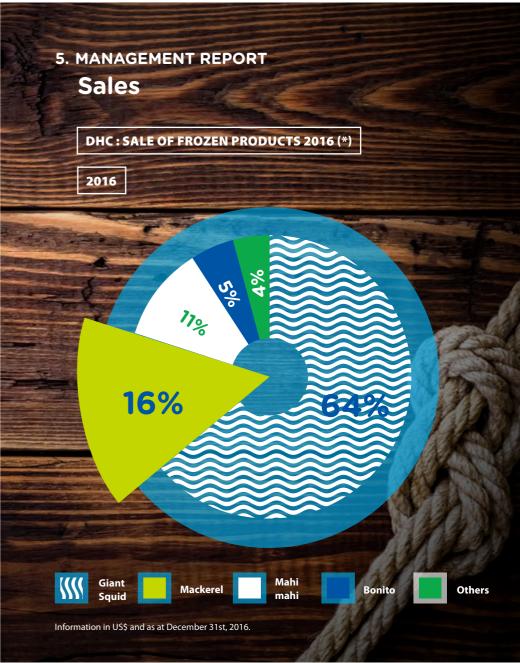

- DHC business sales were reduced by 2% regarding the same period in the previous year, due to a low availability of squid, mahi mahi, among others, which was partly compensated by the presence of mackerel in third quarter.
- It is worth to mention that during the last quarter of 2016, 4,728 MT of mackerel were sold, more than the same period of the previous year (436 MT).
- DHC sales represented 14% of total sales, 12% higher than the previous year.

# **Gross Profit**

US\$ MILLION	AS AT 4Q15	AS AT 4Q16	VARIATION
Sales	156.2	136.1	-13%

Cost of Sales	62%	67%	7%
Costs during non-production periods (*)	16%	21%	33%

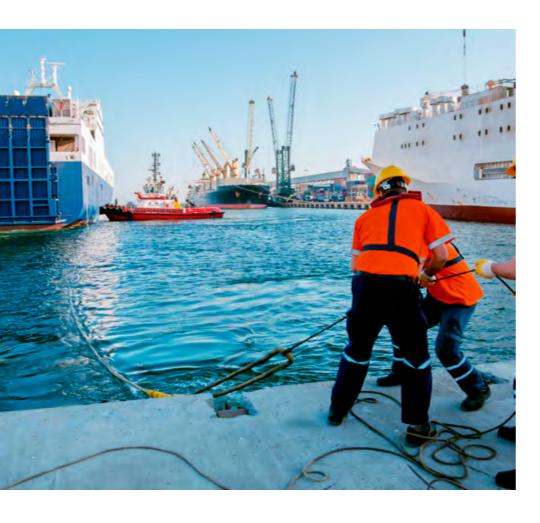

(\*) As at December 31st, 2016, closed season expenses are registered as deferred assets (US\$ 3.7 billon) which will be charged to the inventory values in the second season 2016. Since the presentation of the audited annual financial statements for 2015, they are not considered closed season expenses; there are only non-production costs. Variation of costs incurred in non-production periods is explained in section 3.4.

### **Gross Profit**

- As at December 31st, 2016, gross profit decreased by 50% in comparison to the previous year, as a result of a lower effective catch during the second season 2015 (1,084 thousand MT) and the first season 2016 (914 thousand MT), directly impacting on the financial results of 2016
- It is worth mentioning that gross profit corresponding to DHC was US\$ -4.8 million in 2016, a higher percentage than 2015 (US\$ -8.7 million).

- As at December 31st, 2016, 256 closed days were registered against to 206 days in the previous year, due to the late start of the first season 2016.
- As at December 31st, 2016, the cost of IHC sales represented 64% of IHC sales, higher than the 55% registered in 2015. At the end of 2016, the unit cost of IHC sales increased to US\$ 1,053 per MT <sup>6</sup>, against to US\$ 944 per MT in the previous year, because of lower production volumes and less fishing days.
- As at December 31st, 2016, the cost of anchovy catch per MT increased by 25%, due to a lower volume caught as a result of the short first fishing season 2016 and a lower quota allocated in the second season 2015. The lower volume also generated higher fuel costs due to lower efficiency and higher maintenance costs.

<sup>(\*)</sup> As at December 31st, 2016, the costs of own catch corresponding to the second fishing season 2016 include a part of the deferred assets considered as at September 30th, 2016 (before considered as closed season expenses).

<sup>&</sup>lt;sup>6</sup> Considering MT of fishmeal and fish oil sold.

## **Costs of Sales**

 As at December 31st, 2016 the purchase to third parties explained 52% of the total processed volume. The cost per MT of purchase to third parties decreased by 10% in comparison to the previous year, due to lower prices of fish meal.

	l costs of Forchase to Third Parties		
	As at 4Q15	As at 4Q16	Variation
Purchase to third parties (MT) Cost of purchase to third parties (thousand US\$)	192,982 57,241	173,887 46,324	-10% -19%
US\$/MT	296.6	266.4	-10%

### **Costs of Sales**

The processing cost per MT as at December 31st, 2016 (excluding raw materials) increased by 21% regarding the previous year, due to a lower processing volume for the short period of the first season 2016. The lower volume also generated higher personnel and maintenance costs.

(\*) As at December 31st, 2016, processing costs corresponding to the second fishing season 2016 include a part of the deferred assets considered as at September 30th, 2016 (before considered as closed season expenses).

ANNUAL

# Other incomes and expenses

- - minal value.

#### 5. MANAGEMENT REPORT

# Net **Profit**

- As at December 31st, 2016, the income tax was US\$ -3.5 million, higher than the previous year (US\$ 7.9 million), as a consequence of a negative effect on the Company's deferred liabilities, due to the increase in the income tax rate which varied from 28% to 29.5% for 2017 and beyond. In 2015 the effect was positive because in that year the income tax rate was reduced from 30% to 28%.
- As at December 31st, 2016, the net profit was US\$ -24.8 million, lower than the previous year (US\$ 1.3 million), due to a lower effective catch in 2016 and less availability of species oriented to Direct Human Consumption.

## **Indebtedness:**

- As at December 31st, 2016, the total net debt amounted to US\$ 264.3 million. The long-term debt (current and non-current part) was US\$ 204.0 million, from which US\$ 5.6 million correspond to leasing operations and US\$ 25 million to a 6-year loan for the repurchase of bonds.
- The short-term debt related to working capital increased by 143% in comparison to the previous year (US\$ 67.1 million) and the cash increased by 298% (US\$ 6.7 million), due to the increase in the fishing quota corresponding to the second season 2016 regarding the previous year (2.0 million MT against 1.1 million MT), which implied a greater need for financial resources to cover catch and production ope-

rations, as well as a greater purchase of raw material to third parties.

 As at December 31st, 2016, the Company has a committed line of working capital with Scotiabank for US\$ 20.0 million, covering any eventual need of liquidity. Up to that date, only US\$ 5 million from the above mentioned line have been used.

			DEBT POSITION
US\$ million	As at 4Q15	As at 4Q16	%

# **Financial Indicators**

#### LIQUIDITY:

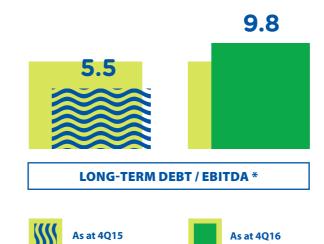

The current test (current assets / current liabilities) was slightly reduced due to higher working capital requirements, resulting from the late start of the first fishing season 2016.

As at 4Q16

#### **SOLVENCY:**

Solvency rates increased due to lower levels of EBITDA for the last twelve months.

(\*) EBITDA for the last twelve months is considered..

### **Financial Indicators**

#### **PROFITABILITY:**

Profitability ratios decreased, due to the late start of the first fishing season 2016 in comparison to the previous year.

PROFITABILITY POSITION				
	As at 4Q15	As at 4Q16		
ROE	1%	-11%		
ROA	0%	-6%		
Net Margin	1%	-18%		

#### **COVENANTS:**

In the international bond issuance for US\$ 200 million, incurrence covenants were agreed into the issuance agreement.

#### **TOTAL DEBT / LTM EBITDA:**

It shows the relation between funds obtained through third parties and operating results. In case this relation is greater than 3.5, we shall not assume more debt, except for the authorized by the baskets made for that purpose, and which are indicated in the corresponding prospectus.

## **Financial Indicators**

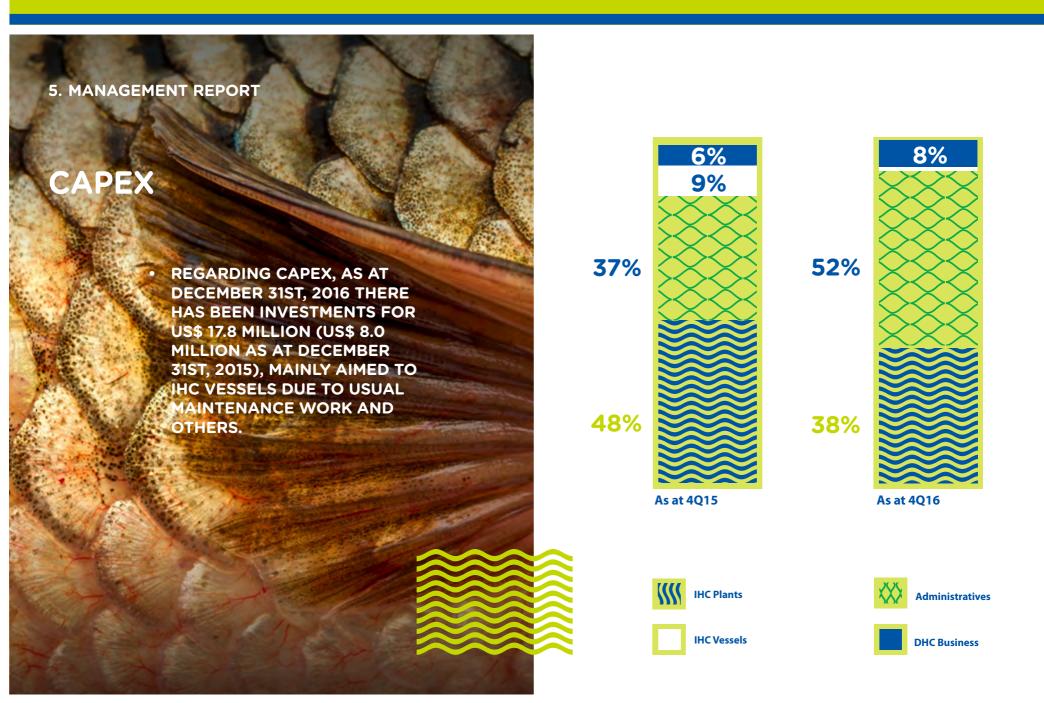

(\*) EBITDA for the last twelve months is considered.

As at December 31st, 2016, the indicator increased from 6.2x to 13.1x, compared to the same period in 2015, as a result of greater initial stocks regarding the previous year.

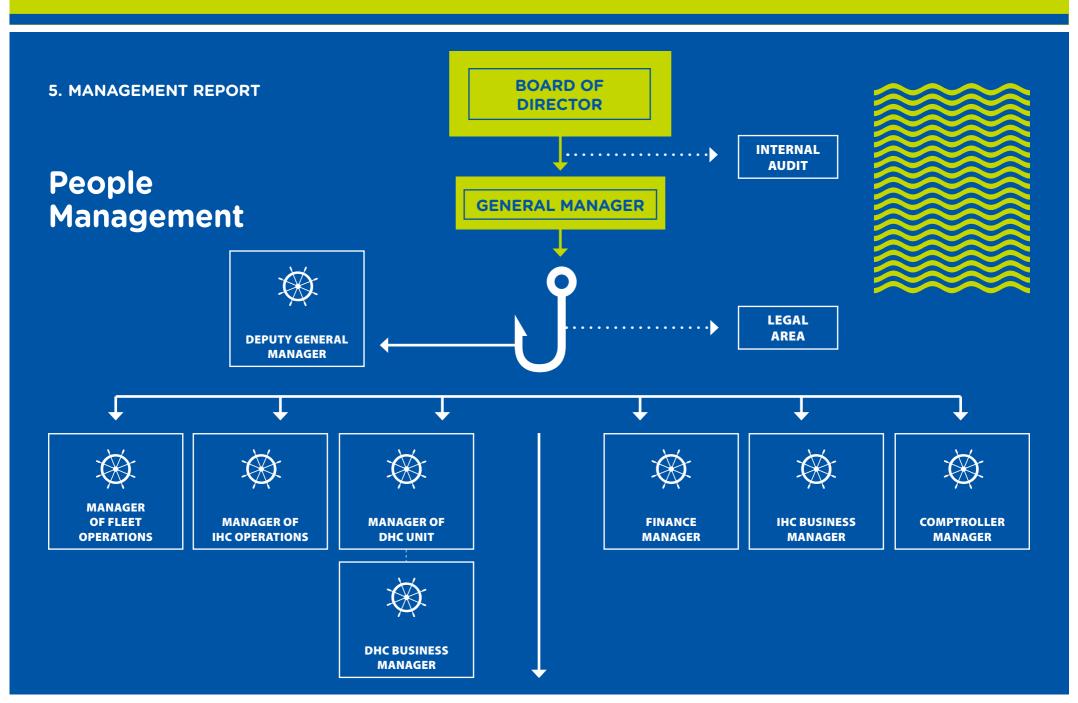

#### **OTHERS:**

- Regarding special relations between the issuer and the State, such as special tax treatment, exemptions, supervision, concessions, among others, Pesquera Exalmar does not have special relations as the aforementioned..
- Regarding judicial, administrative or arbitration proceedings initiated or expected to be initiated against or in favor of the Company, it is considered that there are no proceedings out of the normal development of our operations, and whose result may have a significant impact on our operations and/or financial position.

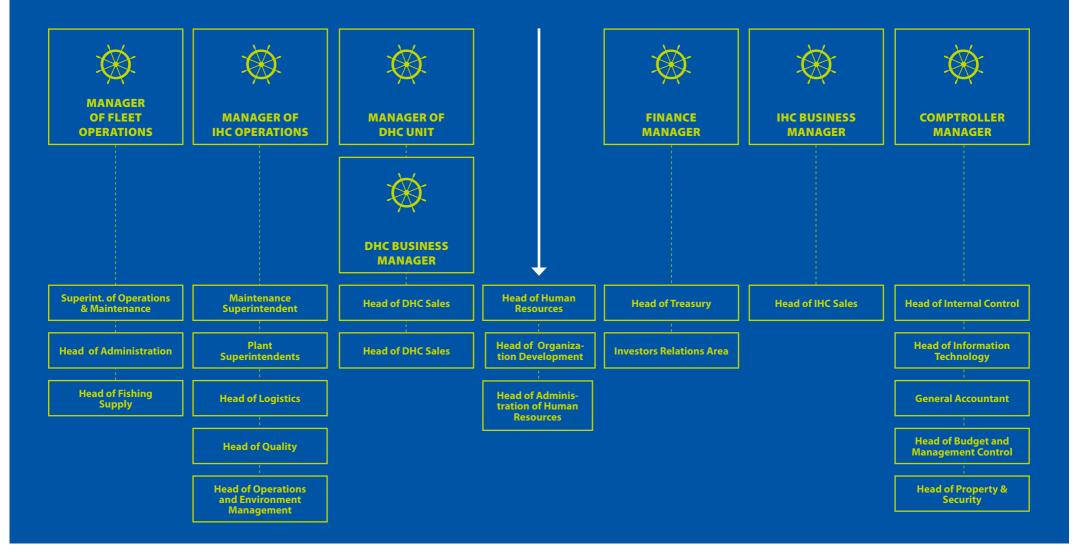

# 5. MANAGEMENT REPORT People Management

### **People Management**

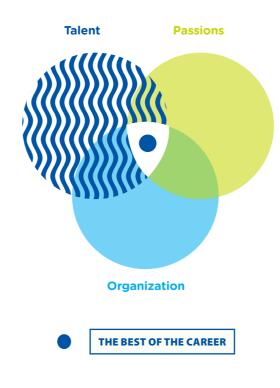

Exalmar and all its collaborators faced a difficult 2016 year, despite the demanding challenges. Exalmar stood out once again because of its adaptability thanks to the efforts of all its collaborators.

The response of Exalmar, before a situation of crisis, is always quick and its fundamental interest is on its collaborators. Thus, the company did not apply a staff reduction or suspension of work. It met timely all its responsibilities and directed its efforts to provide food and health support, as well as other benefits such as tools for development of negotiation, communication and leadership skills.

Human Resources have as strategic objective to achieve that our collaborators are motivated for high performance and they share the mission, vision and values of the Company.

During 2016 we maintained the TOP Model of Development for the Company, which was reminded in the implementation of the Performance Management Program at national level.

Internally we update our procedures according to the new challenges of the Company and we spread them in trainings around all the headquarters at national level, under the Program "Navega Exalmar". The program "Mar Adentro" (Offshore), directed to the headquarters collaborators and their couples, in charge of Mr. Javier Echevarría, psychologist and actor, was carried out. This program was aimed to teach the different strategies of communication so that the participants can understand each other as a couple and start the process of restoring confidence and love. Likewise, we worked jointly in elaborating

the family budget to order the household economy, among others.

Likewise, the development program "Haciendo que las cosas pasen" (Making things happen) was also carried out, in charge of Mr. Roberto Lerner, through a training program on soft skills directed to the leadership of headquarters, with the aim of strengthening leadership skills of those who are in charge of human teams that they must develop and enhance for their personal and professional growth.

There were also useful vacations for the children of collaborators, and several activities were carried out to honor special dates, such as birthdays, mother's day, father's day, fisherman's day, among others.

Facing any crisis situation, Exalmar's response is focused on human factor, thus confirming the company's commitment to human talent and the needs of our people, because we believe in the personal and professional development of our collaborators, through teamwork and an innovative attitude aimed to achieve the results beyond the expectations.

Regarding the total of workers, 453 are temporary workers and 705 are permanent workers, with a total of 1,158 collaborators, a figure that decreased compared to the previous year, having 1,324 collaborators in 2015 and 1,166 in 2014.

# **Quality, Safety, and Environmental Management**

The Company works with teams specialized in providing the necessary support for operating the systems of quality, safety, occupational health, and environment. This ensures a proper performance and safe and innocuous products, highly reducing accidents in plants and avoiding negative environmental impacts.

# **Sustainability Management**

For Exalmar, sustainability management is a fundamental issue that involves the whole company and not only a particular area. With a clear vision for sustainable growth, it develops high quality and high protein marine products, improving and transforming people's living conditions.

Being aware of the importance of human factor, we aim our efforts towards personal and professional development of our collaborators, the fishing ship-owners, our crew, and the artisanal fishermen. Thus, Exalmar provides stable work to 1,158 collaborators, whose families grow with the company; so, many other families who are part of the fishing communities that work with the company are favored with a relationship of trust with Exalmar.

In this way, it has contributed significantly to the development of this sector and to the formalization of the community related to fishing for Indirect Human Consumption, achieving a redistribution of the sector worth to the smaller entrepreneurs, and contributing to their professional, personal development and their families, as well as the progress of areas where the government often does not arrive.

Exalmar seeks all the time to give them the guidance they need to make them a human and work group with better resources to integrate an efficient chain. On the one hand, through fair prices; and, on the other, supporting their training and development of infrastructure, allowing their growth.

Likewise, Exalmar policy is to contribute to the development of entrepreneurs in the areas of influence of the company. Therefore, it tries to work with suppliers from these areas and to contribute to their development, maintaining a close relationship with suppliers in the fields of maintenance, repairs, inspections, analysis, monitoring, among others.

BEING AWARE OF THE
IMPORTANCE OF HUMAN
FACTOR, WE AIM OUR
EFFORTS TOWARDS
PERSONAL AND
PROFESSIONAL DEVELOPMENT
OF OUR COLLABORATORS,
THE FISHING SHIP-OWNERS,
OUR CREW, AND THE
ARTISANAL FISHERMEN.

### **Sustainability Management**

Moreover, in order to maintain a sustainable fishing, a number of control measures for resources management have been implemented in Peru, mainly contained in the General Fisheries Act. These include the Act of Maximum Limits of Catch, closed seasons, protected areas, minimum sizes, percentage of permissible juveniles, the program for monitoring and control fishing and unloading, restricted entry of new fishing vessels, regulation of

fishing nets, satellite control, reserve area for Direct Human Consumption, among others.

Likewise, the company is committed to the preservation of the environment and marine resources, in benefit of the communities where it develops and future generations. Exalmar uses friendly technologies with the environment and keeps searching opportunities to reduce environmental impacts.

Here, it is important to mention the change of the energy source to natural gas in two plants, the system for treatment of effluents coming from the fish pumping water, the environmental talks presented to the community, beach cleaning with the help of collaborators, environmental simulations of hydrocarbon spill and leak, solid waste segregation process, IFFO RS certification that guarantees a responsible production process, ISO 14001: 2004 certification for two plants that reach 35% of the production of Indirect Human Consumption, among others.

EXALMAR HAS THE CAPACITY TO FAVORABLY TRANSFORM ITS ENVIRONMENT, BECAUSE PROGRESS IS A CONCEPT THAT INVOLVES JOINT GROWTH, OF BOTH EXALMAR AND THE FISHING COMMUNITIES THAT WORK WITH THE COMPANY.

Exalmar has the capacity to favorably transform its environment, because progress is a concept that involves joint growth, of both Exalmar and the fishing communities that work with the company. It ratifies one of the greatest strengths: to be promoters of an authentic social transformation inspired by the values of respect, mutual trust, and the ability to establish connections at all levels, from empathy, dialogue and good heart in each one of its actions.

# Investors Relations and Corporate Governance

Investors Relations coordinates the necessary actions to promote the best Corporate Governance practices, which are detailed in the Corporate Governance Report (Annex I). The objective is to achieve an effective communication between Exalmar and its shareholders, bondholders, financial community, and other stakeholders, promoting a permanent communication and transparency in management and spread of information.

For this purpose, various actions are carried out to contact investors, such as reports of results, press releases, telephone conferences, and a permanent attention to requests of information from investors, the media, and regulators of the stock market.

The new corporate website (www.exalmar.com.pe) was launched in 2016, a more accessible, dynamic and attractive structure that provides more information. It facilitates the navigation of users in accordance with the new technologies, adapting to all browsers and devices. It emphasizes the section addressed to the investor, where relevant information has been put available, such as financial statements, quarterly reports, corporate presentations, telephone conferences, and calendar of events, Facts of Importance, among others.

The process of implementation of Corporate Governance practices has been naturally done based on the commitment of the main shareholder and the Top Management. In 2016, Exalmar was recognized for its commitment and leadership in the field of Corporate Governance, being nominated as a finalist of the IFFO Annual Awards.

In the same year, the implementation of an action plan for the adopting improvements began, according to certain criteria established in the diagnosis made the previous year. This plan was successfully implemented in the course of 2016, reaching 74% of progress at the end of the year.

The Company is committed to adopt these practices and makes a permanent effort to improve even more its Corporate Governance, protecting the rights of investors and other stakeholders. In the Peruvian market, with a high presence of family businesses and undeveloped capital market, the company saw in the Corporate Governance a means to establish appropriate mechanisms for the professionalization and sustainability of the company in the long term, taking a great leap forward from a family business to a corporation.

# Changes of Those Responsible for Preparing and Reviewing the Financial Information

Since 2003, the firm Pazos, López de Romaña, Rodríguez, representatives of BDO, has served as external auditor. Since 2007, Beltran, Gris & Asociados S.C.R.L., representatives of Deloitte ToucheTohmatsu, was contracted. In 2013, the Company PricewaterhouseCoopers was appointed as external auditor.

In 2014, Mr. Demian Ballón Espinoza, was hired as Comptroller Manager and is currently responsible for the financial information of the Company.

U

**APPENDIX III** 

Annual audited financial statements.

ms for the professionalization and sustainability of the company in long term, taking a great leap forward from a family business to a corporation.

It is important to emphasize the change in Exalmar: from being a 100% family company to opening its capital through a private equity in 2007. Then, it made an IPO at the end of 2010 and finally issued debt in the international capital market in 2013. The strategic financial decisions adopted and the participation in the capital market generated changes and opportunities for future growth and promoted the implementation of Corporate Governance practices. The company always stood out for presenting information on its administration to the senior management as well as to financial entities; that is, this culture naturally incorporated transparency, through the spread of information. This corporate philosophy, which also represents one of the pillars of Corporate Governance, facilitated the incorporation of the other principles related to Shareholders Rights, General Shareholder Meetings, Board of Directors and Senior Management, and Risk and Compliance.

While in the country many companies see this as distant and costly, with complicated processes that do not add value, in Exalmar incorporating these practices in the company management has brou-

ght benefits and the main one is the permanence in the long term. Investors see Exalmar as a company permanently concerned with improving its good practices and it results in greater interest for investors, as well as diversification of financial sources, especially from foreign banks, with the possibility of obtaining credits under more competitive conditions that we could access before.

#### PROCESS OF IMPLEMENTATION OF PRACTI-CES AND ACTIONS TAKEN

Exalmar is committed to adopt the best practices of Corporate Governance, protecting the rights of investors and other stakeholders. In the last years there were important advances in such matter that allowed the Company being recognized in 2015, by the Lima Stock Exchange, as one of the companies with the highest standards of Corporate Governance, the first and the only one in the fisheries sector to obtain this recognition. In 2016, Exalmar was recognized for its commitment and leadership in the field of Corporate Governance, being nominated as a finalist of the IFFO Annual Awards.

The process of implementation of Corporate Governance practices has been naturally carried out through the commitment of the main shareholder

#### THE CORPORATE GOVERNANCE IN EXALMAR

The Corporate Governance has allowed Pesquera EXALMAR SAA progressing towards the consolidation of an ethical way of doing business, where the managing bodies act considering the needs and expectative of all the stakeholders of the company.

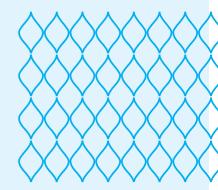

In a stock market like Peru, with high presence of family businesses and an underdeveloped capital market, the Company saw the Corporate Governance as a means to establish the right mechanis-

and Senior Management. In 2015, it was taken services of the specialized consultancy firm Mercado de Capitales, Inversiones y Finanzas Consultores (MC&F), expert in Corporate Governance and accredited guarantor before the Lima Stock Exchange was contracted, in order to make a diagnosis of the company to identify key areas for improvement in relation to the provisions of the best standards.

Strengths and weaknesses were identified for each pillar of Corporate Governance and, at the beginning of 2016, it started the implementation of an action plan for adopting improvements according to certain prioritization criteria already established. That plan has been successfully implemented in the course of 2016, reaching an advance of 74% at the end of the year. Some actions implemented are the following:

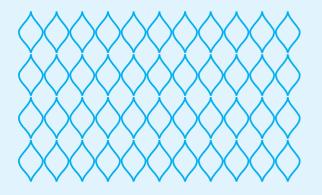

#### SHAREHOLDER RIGHTS, PROMOTING EXCE-LLENCE IN TREATMENT OF THE INVESTOR

In 2016, 813 actions have been carried out to contact investors through various tools. 22 important events and 23 press releases were sent out, 557 emails and 66 telephone inquiries were answered, among others. It also participated in events with investors at local and international level, which are detailed below:

DATE	EVENT
January	Santander, Cancún
March	Larrain Vial, Santiago
March	11th Atlantic Seafood Forum
May	BBVA, Nueva York
June	Procapitales, Lima
September	Credicorp, Lima

We had quarterly telephone conferences with investors after the presentation of financial results, in charge of the General Manager, Rossana Ortiz, accompanied by the Finance and Administration Manager, Raúl Briceño, who participated in the last Conference Call (the third quarter of 2016) with 19 investors. Both the recording and the presentation were promptly published on the website of the Company.

**PARTICIPATION IN CONFERENCE CALLS** 

On April 13th, 2016, the Company's Annual Compulsory Meeting of Shareholders was held, which was announced on March 15th, 2016.

With 75.10% of quorum it was approved, among others, the General Meeting Regulations of Shareholders, which is aimed to detail the guidelines that regulate the operation of the General Shareholders' Meeting, related to the agenda and call,

participation and exercise of shareholder rights, among others.

Regarding information requests from shareholders, they may be done through the following means:

- By telephone: (511) 441-4420, extension 1051.
- E-mail of the responsible of Investor Relations: ozuniqa@exalmar.com.pe
- "Service to the Investor" Department in the website: www.exalmar.com.pe
- In person or by simple letter.
   Address: Av. Víctor Andrés Belaunde 214, San Isidro, Lima, Perú.

On the other hand, the new corporate website (www.exalmar.com.pe) was launched, with more accessible, dynamic, and attractive structure that provides more information, makes easier the user navigation, and is in line with the new technologies, adapting to all browsers and devices. It emphasizes the section addressed to the investor, where relevant information has been made available such as financial statements, quarterly reports, corporate presentations, telephone conferences, calendar of events, Facts of Importance, among others.

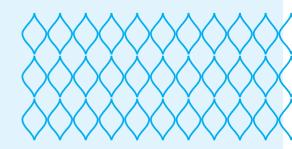

#### Among other actions carried out:

- Spread of Renewed Annual Report and Corporate Governance Report.
- Publication of quarterly reports, presentations, press releases, etc.
- Approval of the Shareholder's Meeting Regulations.
- Single-class shares with voting rights. One vote per share.
- Separate voting right for independent issues.
- Obligation to report in cases of operations that may lead to dilution.
- Spread of announcement and documents related to the Board.
- Right of representation. Power of attorney
   Model with sense of vote.
- Restriction to representation in favor of directors and managers.
- Spread of dividend policy and strict compliance.
- Procedure for inclusion of agenda items.
- Incorporation of arbitration as a possible means of dispute settlement.

 Board of Directors and Management Team, promoting an adequate participation of the Board and Management as well as clear policies:

The company has a Board of Directors comprised by people with different specialties and competences, with prestige, ethics, sufficient availability and other qualities relevant to the company, so that there are various approaches and opinions.

There is a Board comprised by five independent members and two dependant members (Chairman and Vice-Chairman), with a total of seven directors, ensuring plurality and representativeness for all the stakeholders. As at December 31st, 2016, the members of the Board of Directors are:

BOARD OF DIRECTORS	
Víctor Matta Curotto	Chairman
Víctor Matta Dall'Orso	Vice-chairman
María Cecilia Blume Cillóniz	Independent Director
Rodrigo Sarquis Said	Independent Director
Andrés Muñoz Ramírez	Independent Director
Cristian Celis Morgan	Independent Director
Martín Ramos Rizo Patrón	Independent Director

The Chairman has more than 40 years of experience in fisheries sector and the management team is comprised by independent professionals with wide experience. There are also Board Committees, whose sessions are fundamental for the achievement of strategic objectives, facilitating a permanent monitoring of some tasks of special relevance, becoming a very effective support to the Board in order to make better decisions. The Board Committees are as follows:

- Corporate Governance Committee.
- Audit Committee.
- Nomination and Remuneration Committee.
- Committee of Risks.
- Finance Committee.

Likewise, there is also a Regulation of the Board of Directors and its Committees, which details the guidelines governing the operation of the Board, its composition, functions and responsibilities, with the purpose of promoting transparency, in line with Corporate Governance practices.

#### Among other actions carried out:

- Own definition of independence.
- Election of directors once a year.
- Induction program for directors.
- Established session schedule.
- Timely delivery of information to directors.
- Board Committees headed by independents.
- Positions of Chairman and General Manager are given to different people.
- Prohibition to grant loans to a director without the Board approval.
- Executive body responsible for implementing GCG improvements: Investors Relations.
- There are no alternate directors.
- Implementation of a Strategic Plan. Participation in making strategic objectives.
- Transparency of Information, practicing a transparent communication with its stakeholders, generating relationships of trust:

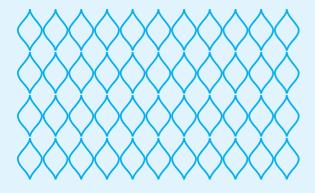

The company has Internal Rules of Conduct, which establish the regulations to be followed

to protect confidentiality of reserved or privileged information on the Company, determining internal responsibilities and procedures for the elaboration and communication of the Facts of Importance.

Likewise, it has a Policy for Classification, Management and Dissemination of Information, which establishes the guidelines and provisions for an adequate classification and management of the Company's information, in order to safeguard its confidentiality and ensure its proper dissemination to the general public, truthfully, transparently, equitably, timely, and in accordance with current legislation.

#### Among other actions carried out:

- Timely publication of Facts of Importance, and Press Releases.
- Participation in events and one-to-one meetings. Publication of quarterly reports, presentations, etc.
- Website renewal. "Investors" section.
- Dissemination of renewed Annual Report and Corporate Governance Report.

# • Risk and compliance, promoting adequate risk management:

The company has a Risk Committee that supervises the execution of the integral risk management strategy, which is chaired by an independent director.

Likewise, it has an Audit Committee, which is chaired by an independent director, who supervises the external and internal audit process and is responsible for the selection, supervision and removal of auditors.

Among other actions carried out:

- Updating of Code of Ethics and Conduct in Businesses.
- Independence of the Internal Auditor, who reports to the Audit Committee.
- Implementation of complaints procedure to the Code of Ethics and Conduct in Businesses, for both collaborators and third parties, by the Internal Auditor.
- External audit firms of recognized prestige.
- Internal training programs on internal procedures and policies.
- Comprehensive Risk Management Policy.

#### **COMMITMENT AND CHALLENGES FOR 2017**

Exalmar is committed to the adoption of the Best Corporate Governance practices, protecting the rights of investors and other stakeholders. It is not enough to create procedures or manuals that reflect good practices, it is essential to know and internalize the concept and that it is actually applied at all levels of the organization, starting from the Board. This is the great challenge, the challenge that allows moving from a family business to a corporation, ensuring sustainability and promoting the development of the stock market.

In 2017 we expect to continue with the implementation of the working plan developed in coordination with the consultancy firm MC&F, in the search of excellence in matters of Corporate Governance, for the satisfaction of our stakeholders. For that, two key actions to be launched in 2017 stand out: (i) Board Diagnosis and Evaluation, and (ii) Diagnosis of Sustainability Management.

# Detalle de las acciones implementadas por la Sociedad

La compañía se encuentra trabajando en una definición formal de sus grupos de interés como parte de un diagnóstico de sostenibilidad que se viene trabajando este año 2017. Por ello, a continuación se presenta una definición preliminar de los mismos.

#### **CLIENTES:**

Los clientes de Exalmar se pueden dividir en dos categorías: los de Consumo Humano Indirecto y los de Consumo Humano Directo. La empresa cuenta con clientes en 27 países, distribuidos en los cinco continentes, pero principalmente en Asia.

Los clientes de Consumo Humano Indirecto son, en gran parte, brokers y traders con los cuales la compañía mantiene una relación de fidelización, promovida a través de los años gracias a sus productos de calidad. En ese sentido, la compañía cuenta con el aval de diversas certificaciones en materia de calidad:

- GMP+B2: garantiza la inocuidad alimentaria en toda la cadena de producción y con proveedores, a través de un control de calidad basado en HACCP, SSOP, GMP e ISO 9001.
- IFFO RS: estándar global para suministro responsable, considerando el abastecimiento, producción y trazabilidad.

- BASC Comercio Seguro: alianza empresarial para un comercio seguro con cooperación nacional e internacional dentro de nuestro proceso productivo y de comercialización.
- Friends of the Sea (FOS): certificación para productos de pesquería y acuicultura sostenibles.
- AC Omega 3/UE: habilitación para producir y exportar aceite Omega 3 para consumo humano al mercado europeo.

En el caso de Consumo Humano Directo, la compañía cuenta con las siguientes certificaciones:

- British Retail Consortium (BRC): estándar mundial que garantiza la calidad y seguridad de los productos alimenticios.
- Tesco Food Manufacturing Standard (TMFS): reconocimiento como proveedor autorizado de la cadena de Supermercados Tesco a nivel mundial.
- BASC Comercio Seguro: alianza empresarial para un comercio seguro con cooperación nacional e internacional dentro de nuestro proceso productivo y de comercialización.

En suma, la empresa enfoca sus esfuerzos en mantener estándares de calidad para brindar excelentes productos a sus clientes y sostener su compe-

## Sección B

# Detalle de las acciones implementadas por la Sociedad

titividad en el mercado, lo cual es muy valorado y genera lazos muy fuertes, de lealtad y de largo plazo con nuestros clientes.

#### **COLABORADORES:**

La cultura de la compañía se caracteriza por la responsabilidad de su gente, así como por su capacidad de enfrentar obstáculos y ser perseverante para superar retos. Uno de los factores clave para lograr ese nivel de compromiso es la estrategia de desarrollo de personas que promovemos en la empresa..

El modelo de desarrollo de la compañía se basa en el modelo TOP que describe cómo todos los colaboradores, independientemente de su posición, pueden aumentar su impacto y su contribución con la organización. La empresa cree en el desarrollo personal y profesional de sus colaboradores, a través del trabajo en equipo y de una actitud innovadora, orientada a lograr resultados más allá de lo previsible.

Para expresar el compromiso de Exalmar con el progreso profesional, familiar y personal de sus colaboradores a nivel nacional, se han desplegado diversas iniciativas, tales como:

 Programa Escuela de Líderes, dirigido a los Gerentes, Jefes y Superintendentes, quienes participaron de talleres que buscan reforzar

- sus habilidades de liderazgo y desarrollo de personas en beneficio de toda la organización.
- Programa Desarrollo de Talentos, para todos los colaboradores de la organización, a través del cual tuvieron la oportunidad de descubrir sus talentos, pasiones y oportunidades profesionales.
- Programa Mar Adentro, espacio de aprendizaje para fortalecer valores, habilidades y talentos que permitan construir buenas relaciones personales, familiares y profesionales.

#### **ARMADORES PESQUEROS Y PROVEEDORES:**

La compañía orienta sus esfuerzos de formalización, mejora y capacitación hacia los armadores pesqueros, proveedores que son considerados por Exalmar como aliados estratégicos. Algunas iniciativas que impulsa son las siguientes:

- Programa Pesca Puntos, que premia las buenas prácticas y la lealtad del armador que decide descargar su pesca del día con Exalmar.
- También financia, con capital propio, la descarga en sus plantas. Así permite, además, realizar trabajos de mantenimiento y mejoras operativas en las embarcaciones con las que los pescadores artesanales se ganan la vida.
- Realiza talleres de supervivencia y de navegación, así como asesorías en temas legales

## Sección B

# Detalle de las acciones implementadas por la Sociedad

y contables, para apoyarlos en la inserción y participación en la formalidad.

De esta manera, se ha contribuido significativamente con el ordenamiento del sector y la formalización de la comunidad relacionada con la pesca de Consumo Humano Indirecto, logrando una redistribución del valor del sector hacia los empresarios más pequeños.

Actualmente, la empresa ha asumido el reto de continuar esta formalización en el Consumo Humano Directo. Se trata de un desafío importante debido a la cantidad de pescadores artesanales informales y a la diversidad de agrupaciones representativas de diversas especies.

Asimismo, Exalmar tiene como política la contribución al desarrollo de empresarios de las zonas de influencia de la compañía. Por ello, mantiene una estrecha relación con sus proveedores en los rubros de mantenimiento, reparaciones, inspecciones, análisis, vigilancia, entre otros.

#### **ACCIONISTAS:**

Exalmar practica una comunicación transparente, fluida, oportuna y equitativa con sus accionistas, generando relaciones de confianza. Al 30 de setiembre del 2016, el accionista mayoritario, el señor Víctor Matta Curotto, cuenta con una participación del 71%, dejando un 29% de floating,

donde destaca un 26% de participación de inversionistas institucionales extranjeros, así como un 3% en manos de inversionistas locales.

La compañía está comprometida con la adopción de las mejores prácticas de protección de los derechos de los inversionistas y otros grupos de interés. Se han realizado importantes avances en esta materia, permitiendo que, en el 2015, Exalmar sea reconocida por la Bolsa de Valores de Lima como una de las compañías con más elevados estándares de Buen Gobierno Corporativo, siendo la primera y única empresa del sector pesquero en obtener dicho reconocimiento.

El área de Relación con Inversionistas facilita esta interacción y promueve una comunicación efectiva y transparente mediante diversas herramientas, tales como informes, notas de prensa, conferencias telefónicas, participación en eventos, atención de solicitudes de información de inversionistas, medios de comunicación y entidades reguladoras del mercado de valores, entre otros. Asimismo, coordina las acciones necesarias para promover las mejores prácticas de Buen Gobierno Corporativo.

En un mercado como el peruano, con alta presencia de empresas familiares y un mercado de capitales poco desarrollado, la Compañía vio en el Buen Gobierno Corporativo un medio para establecer los mecanismos adecuados para la profesionalización y sostenibilidad de la empresa

## Sección B

# Detalle de las acciones implementadas por la Sociedad

en el largo plazo, dando el gran paso de empresa familiar a corporación.

Exalmar siempre destacó por presentar información sobre su gestión a la alta dirección, así como a las entidades financieras; es decir, la cultura incorporaba de manera natural la transparencia a través de la difusión de información. Esta filosofía empresarial, que además representa uno de los pilares del Buen Gobierno Corporativo, facilitó la incorporación de principios relacionados con los Derechos de los Accionistas, Juntas Generales de Accionistas, Directorio y Alta Gerencia, y Riesgo y Cumplimiento.

Exalmar es vista como una empresa preocupada permanentemente en mejorar sus buenas prácticas, y ello tiene como resultado un mayor interés de inversionistas en la compañía, así como una diversificación de las fuentes de financiamiento, especialmente de bancos extranjeros, con la posibilidad de obtener créditos en condiciones mucho más competitivas que aquellas a las que se podía acceder antes.

#### **SOCIEDAD:**

Exalmar contribuye con la sociedad a través de la provisión de una alimentación saludable y de alto valor proteico que además busca mejorar y transformar las condiciones de vida de las personas.

La empresa ha realizado un aporte importante en la profesionalización y ordenamiento del sector en el rubro del consumo humano indirecto, apoyando a través de diversas herramientas a los armadores pesqueros que trabajan con nosotros, contribuyendo a su desarrollo profesional y personal y el de sus familias, así como al progreso de zonas en las que muchas veces el gobierno no suele llegar.

Es así que Exalmar brinda trabajo estable a 1,146 colaboradores, cuyas familias crecen con la compañía; así también, muchas otras familias que son parte de la comunidades de la pesca que trabajan con la empresa se ven favorecidas de manera indirecta, gracias a la generación de una relación de confianza con los armadores pesqueros y pescadores artesanales que trabajan con Exalmar.

#### **ESTADO:**

La compañía cree firmemente en la permanencia de la comunidad artesanal en la pesca de la pota o calamar gigante, y en evitar la industrialización de esta actividad, contribuyendo con miles de familias que dependen de esta pesca.

Por esta razón, participa en diversas iniciativas del Estado para dialogar con las entidades correspondientes, buscando alternativas de mejora para estos pescadores en diferentes frentes.

## Sección B

# Detalle de las acciones implementadas por la Sociedad

Se llevan a cabo comités especializados para obtener un marco regulatorio más adecuado para la pesca de pota, empezando con los procedimientos para la investigación sobre la biomasa de parte de IMARPE, evaluación de un sistema de cuotas individuales, además de solucionar el problema de la presencia de embarcaciones chinas en la costa peruana, buscando contribuir a la formalización y desarrollo de todas las comunidades de pescadores artesanales relacionados con el consumo humano directo.

#### **MEDIO AMBIENTE:**

La empresa está comprometida con la preservación del medio ambiente y de los recursos marinos, en beneficio de las comunidades y de sus futuras generaciones.

Exalmar utiliza tecnologías amigables con el medio ambiente y mantiene una búsqueda constante de oportunidades para reducir impactos ambientales. Entre las prácticas sobresalen:

- Cambio de la matriz energética a gas natural en dos de las plantas.
- Sistema para tratamiento de efluentes provenientes del agua de bombeo de pescado.

- Charlas medioambientales presentadas a la comunidad.
- Limpieza de playas con participación de los colaboradores.
- Simulacros ambientales de derrame y fuga de hidrocarburos.
- Proceso de segregación de residuos sólidos.

Además, tenemos las certificaciones IFFO RS (que avala un proceso de producción responsable) e ISO 14001:2004 (para dos plantas que alcanzan el 35% de la producción de Consumo Humano Indirecto), entre otras buenas prácticas.

#### ANNUAL AUDITED FINANCIAL STATEMENTS

#### DICTAMEN DE LOS AUDITORES INDEPENDIENTES

A los señores Accionistas y a los miembros del Directorio Pesquera Exalmar S.A.A.

28 de feberro de 2017
